Data Communication And Networking Forouzan 5th Edition Ppt:

Data Communications and Networking Global Edition 5e Behrouz A. Forouzan, 2012-05-16 The fifth edition of Behrouz Forouzan's *Data Communications and Networking* presents a comprehensive and accessible approach to data communications and networking that has made this book a favorite with students and professionals alike. More than 830 figures and 150 tables accompany the text and provide a visual and intuitive opportunity for understanding the material. This unique approach minimizes the need for heavy math content, allowing normally complicated topics to unfold graphically and visually rather than through the presentation of complex formulas. The global edition has been developed specifically to meet the needs of international computer networks students. In addition to a chapter on the peer-to-peer paradigm, a full chapter on quality of service (QoS), generous coverage of forward error correction, coverage of WiMAX, and material on socket interface programming in Java, we have added new international end-of-chapter questions and problems to make the content more relevant and improve learning outcomes for the international student.

The supplements package for the fifth edition now features an Instructors Resource CD-ROM that includes the Instructors Manual, Test Bank, TestGenEQ Quiz, MasterEQ software with on-line testing capabilities, and a classroom presentation show created in PowerPoint. Expanded coverage of emerging technologies including LANs, the Internet, and common carrier services. Ch 4 New Internet Chapter 13 Accessing and Using the Internet and Chapter 14 Internet Technology include digital case, electronic commerce, and Internet technology coverage.
