Theology that Matters Darby Kathleen Ray, What difference does theological thinking make Does Christianity have any relevance for our secular globalized environmentally threatened world Specifically formulated for undergraduate and seminary courses in theology this volume answers a resounding yes Gathering many respected and original Christian thinkers who have been inspired by the example and work of theologian Sallie McFague this book engages such topics as God Christ revelation eschatology and church in three intertwined and pressing areas 1 our religious life and language in a secularized pluralistic society 2 our newly globalized economic life and 3 our threatened environmental life

Magic, Science, and Empire in Postcolonial Literature Kathleen Renk, 2012-03-29 This book examines the ways in which contemporary British and British postcolonial writers in the after empire era draw connections between magic defined here as Renaissance Hermetic philosophy and science Writers such as Tom Stoppard Zadie Smith and Margaret Atwood critique both imperial science or science used in service to empire and what Renk calls imperial science a distortion of rational science which denies that reality is holistic and claims that nature can and should be conquered In warning of the dangers of imperial science these writers restore the connection between magic and science as they examine major shifts in scientific thinking across the centuries They reflect on the Copernican Revolution and the historic split between magic and science scrutinize Darwinism consider the relationship between Victorian science and pseudo science analyze twentieth century Uncertainty theories reject bio genetic engineering call for a new approach to science that reconnects science and art and ultimately endeavor to bring an end to the imperial age Overall these writers forge a new discourse that merges science with the arts and emphasizes a holistic philosophy a view shared by both Hermetic philosophy and recent scientific theories such as chaos or complexity theory Along with recent books that focus on the relationship between contemporary literature and science this work focuses on contemporary British literature's critique of science and the ways in which postcolonial literature addresses the relationship between magic science and empire

ERM - Enterprise Risk Management Jean-Paul Louisot, Christopher H. Ketcham, 2014-06-03 A wealth of international case studies illustrating current issues and emerging best practices in enterprise risk management Despite enterprise risk management s relative newness as a recognized business discipline the marketplace is replete with guides and references for ERM practitioners Yet until now few case studies illustrating ERM in action have appeared in the literature One reason for this is that until recently there were many disparate even conflicting definitions of what exactly ERM is and more importantly how organizations can use it to utmost advantage With efforts underway internationally to mandate ERM and to standardize ERM standards and practices the need has never been greater for an authoritative resource offering risk management professionals authoritative coverage of the full array of contemporary ERM issues and challenges Written by two recognized international thought leaders in the field ERM Enterprise Risk Management provides that and much more Packed with international cases studies illustrating ERM best practices applicable across all industry sectors and business models Explores contemporary issues including quantitative and qualitative measures as well as potential pitfalls and challenges facing today s enterprise risk managers Includes interviews with leading risk management theorists and practitioners as well as risk managers from a variety of industries An indispensable working resource for risk management practitioners everywhere and a valuable reference for researchers providing the latest empirical evidence and an exhaustive bibliography

The Physics and Metaphysics of Transubstantiation Mark P. Fusco, 2023-08-18 In this book Mark P Fusco offers a historical philosophical and theological review and appraisal of current research into quantum post modern atheistic mathematical and philosophical theories that engage our interpretation of Hans Urs von Balthasar and Ferdinand Ulrich s accounts of Ur Kenosis This cross disciplinary approach inspires a new speculative metaphysical theory based on the representation of being as a holo somatic ontology Holocryptic metaphysics gives us a novel interpretation of transubstantiation as it is founded on the findings of quantum mechanical theory The quantum object and black hole s properties present a new way to explain physical matter based on its holographic identity This scientific theory for representing physical matter s identity is recognized for example in the symmetry existing between a subatomic particle and its orbital shell a single particle s identity in relationship to its thermodynamic system Hawking radiation and black hole entropy Further the properties of quantum non locality and teleportation signpost a new way to understand the Eternal Logos relationship to Jesus Christ and the Eucharist

Yijing, Shamanic Oracle of China Richard Bertschinger, 2011-11-15 This new translation of the Yijing offers a traditional reading that refreshes and expands on the

original text making it relevant for the modern world It provides a detailed commentary explaining the underlying structure philosophy and history of the book and gives practical instructions for consulting the oracle using yarrow sticks or coins

The Emergence of Us Tim Gooding,2006-07-31 What force compels people who are deeply concerned about the state of the earth to pollute on a daily basis Just as gravity affects us all regardless of whether you believe in science spiritual laws or the omnipotence of God human emergent behavior works invisibly to define the character of our society These forces are created whenever enough people come together to form a group a society or all of humankind People s thoughts and actions are then subtly herded by these mechanistic forces By becoming aware of human emergent behavior we create the opportunity to bring consciousness and love to this powerful presence that is blindly ravaging society and the world **The**

Web's Awake Philip D. Tetlow,2007-04-27 The central thesis of *The Web s Awake* is that the phenomenal growth and complexity of the web is beginning to outstrip our capability to control it directly Many have worked on the concept of emergent properties within highly complex systems concentrating heavily on the underlying mechanics concerned Few however have studied the fundamentals involved from a sociotechnical perspective In short the virtual anatomy of the Web remains relatively uninvestigated *The Web s Awake* attempts to seriously explore this gap citing a number of provocative yet objective similarities from studies relating to both real world and digital systems It presents a collage of interlinked facts assertions and coincidences which boldly point to a Web with powerful potential for life *Poetics of Cinema* David

Bordwell,2012-11-12 Bringing together twenty five years of work on what he has called the historical poetics of cinema David Bordwell presents an extended analysis of a key question for film studies how are films made in particular historical contexts in order to achieve certain effects For Bordwell films are made things existing within historical contexts and aim to create determinate effects Beginning with this central thesis Bordwell works out a full understanding of how films channel and recast cultural influences for their cinematic purposes With more than five hundred film stills *Poetics of Cinema* is a must have for any student of cinema *A Librarian's Guide to Graphs, Data and the Semantic Web* James Powell,2015-07-09

Graphs are about connections and are an important part of our connected and data driven world *A Librarian s Guide to Graphs Data and the Semantic Web* is geared toward library and information science professionals including librarians software developers and information systems architects who want to understand the fundamentals of graph theory how it is used to represent and explore data and how it relates to the semantic web This title provides a firm grounding in the field at a level suitable for a broad audience with an emphasis on open source solutions and what problems these tools solve at a conceptual level with minimal emphasis on algorithms or mathematics The text will also be of special interest to data science librarians and data professionals since it introduces many graph theory concepts by exploring data driven networks from various scientific disciplines The first two chapters consider graphs in theory and the science of networks before the following chapters cover networks in various disciplines Remaining chapters move on to library networks graph tools graph

analysis libraries information problems and network solutions and semantic graphs and the semantic web Provides an accessible introduction to network science that is suitable for a broad audience Devotes several chapters to a survey of how graph theory has been used in a number of scientific data driven disciplines Explores how graph theory could aid library and information scientists **Complexity and Dynamics** ,2017 **The Great Mental Models, Volume 2** Shane
