Feedback Economics Robert Y. Cavana, Brian C. Dangerfield, Oleg V. Pavlov, Michael J. Radzicki, I. David Wheat, 2021-06-30 This book approaches economic problems from a systems thinking and feedback perspective By introducing system dynamics methods including qualitative and quantitative techniques and computer simulation models the respective contributions apply feedback analysis and dynamic simulation modeling to important local national and global economics issues and concerns Topics covered include an introduction to macro modeling using a system dynamics framework a system dynamics translation of the Phillips machine a re examination of classical economic theories from a feedback perspective analyses of important social ecological and resource issues the development of a biophysical economics module for global modelling contributions to monetary and financial economics analyses of macroeconomic

growth income distribution and alternative theories of well being and a re examination of scenario macro modeling The contributions also examine the philosophical differences between the economics and system dynamics communities in an effort to bridge existing gaps and compare methods Many models and other supporting information are provided as online supplementary files Consequently the book appeals to students and scholars in economics as well as to practitioners and policy analysts interested in using systems thinking and system dynamics modeling to understand and improve economic systems around the world Clearly there is much space for more collaboration between the advocates of post Keynesian economics and system dynamics More generally I would like to recommend this book to all scholars and practitioners interested in exploring the interface and synergies between economics system dynamics and feedback thinking Comments in the Foreword by Marc Lavoie Emeritus Professor University of Ottawa and University of Sorbonne Paris Nord
