**International Conference on Management Leadership and Governance** Dr Vincent Ribiere,2018-05-24 These proceedings represent the work of researchers participating in the 6th International Conference on Management Leadership and Governance ICMLG 2018 which is being hosted this year by the Institute for Knowledge and Innovation Southeast Asia IKI SEA a Centre of Excellence of at Bangkok University Thailand on 24 25 May 2018 Accounting for Value in Marx's

Capital Robert Bryer,2017-09-07 Many scholars discuss Marx's Capital from many perspectives but Accounting for Value uniquely advances and defends an accounting interpretation of his theory of value that he used it to explain capitalists accounts It confirms and builds on the Temporal Single System Interpretation's refutation of the charge that Marx's illustration of the transformation from values to prices is inconsistent and its defense of his Law of the Tendency of the Rate of Profit It rejects other interpretations by showing that only a temporal single system interpretation is consistent with Marx's accounting The book shows that Marx became seriously interested in accounts from the late 1850s during an

important period in the development of his critique of political economy asking Engels for information and explanations Examining their letters in the context of Marx s evolving work it argues supports the hypothesis that discovering he could explain them with his theory of value gave him the breakthrough he needed to decide how to present his work and explains why in 1862 he decided to change its title to Capital Marx s explanations of capitalist accounting it concludes amount to an accounting theory that explains how individual capitalists and the capital market use what is for many the invisible hand of accounting to control the production and distribution of surplus value Marx claimed his theory of value was a work of science a critique of political economy that would deliver a theoretical blow from which the bourgeoisie would never recover He failed critics argue because his critique depends on hypothetical entities which we cannot directly observe such as value and abstract labour surplus value which means his theory is not open to empirical refutation The book however argues that he used his theory of value to explain the phenomenal forms of profit rate of profit etc by explaining the observable accounting principles and practices capitalists use to calculate and control them in which as he said we can glimpse the determination of value by socially necessary labor time which experience could have refuted

*Activity-Based Costing for Marketing and Manufacturing* Ronald Lewis, 1993-05-30 The declining domination of American

manufacturers in world class markets has resulted in widespread criticism of traditional costing methods Activity based accounting for manufacturing costs emerged in the 1980s to satisfy the changes taking place in production methods and techniques such as Just in Time Inventory Control and Flexible Manufacturing Systems Although activity based costing methods may be new in manufacturing processes they have been advocated and applied by marketing managers since the late 1960s according to Professor Lewis The accounting profession has finally recognized the advantages of activity based concepts and methods for both marketing and manufacturing functions This book shows how activity based methods and other cost analysis and control techniques may be used by manufacturing and marketing managers Part I explains the cost concepts and terminology used in modern businesses and describes the concept of a fully integrated manufacturing and costing system In world class competition the costing systems must serve the total needs of management not just financial reporting requirements Costing systems must be flexible and multi purpose which is both possible and practical with state of the art computers and software Part II summarizes the traditional cost accounting systems describing job costing and standard costing systems The allocation of costs becomes more important with technological advances A full chapter is devoted to the methods of allocation and the changes required to satisfy advanced manufacturing and activity based costing techniques Part III illustrates activity based costing for manufacturing activity based costing for marketing and an activity based approach to the behavior of costs as well as explaining the traditional factors of variability Part IV describes the techniques that are necessary for analysis and control of costs by management To be well informed managers must know the fundamentals of break even analysis relevant costing capital budgeting ROI and transfer pricing The book makes these techniques easy to understand and to apply to real life situations It is particularly appropriate for manufacturing managers involved in operations and for all marketing managers
