What We Think About When We Try Not To Think About Global Warming Toward A New Psychology Of Climate Action:

What We Think About When We Try Not To Think About Global Warming Per Espen Stoknes, 2015-04-03 Why does knowing more mean believing and doing less A prescription for change The more facts that pile up about global warming the greater the resistance to them grows making it harder to enact measures to reduce greenhouse gas emissions and prepare communities for the inevitable change ahead It is a catch 22 that starts says psychologist and economist Per Espen Stoknes from an inadequate understanding of the way most humans think act and live in the world around them With dozens of examples from the private sector to government agencies Stoknes shows how to retell the story of climate change and at the same time create positive meaningful actions that can be supported even by deniers In *What We Think About When We Try Not To Think About Global Warming* Stoknes not only masterfully identifies the five main psychological barriers to climate action but addresses them with five strategies for how to talk about global warming in a way that creates action and solutions not further inaction and despair These strategies work with rather than against human nature They are social positive and simple making climate friendly behaviors easy and convenient They are also story based to help add meaning and create community and include the use of signals or indicators to gauge feedback and be constantly responsive Whether you are working on the front lines of the climate issue immersed in the science trying to make policy or educate the public or just an average person trying to make sense of the cognitive dissonance or grapple with frustration over this looming issue *What We Think About When We Try Not To Think About Global Warming* moves beyond the psychological barriers that block progress and opens new doorways to social and personal transformation *Das Klimafolgen-Buch* Thomas Hax-Schoppenhorst, 2024-11-11 Die globale von Menschenhand bewirkte Klima und Biodiversitätskrise hat trotz eindringlicher Mahnungen vor bereits 50 Jahren ein bedrohliches Ausmaß erreicht Die Erderwärmung verursacht schon heute weit verbreitete Störungen in der Natur und richtet verheerende Schäden in Meeres Land und Süßwassersystemen an Es gibt keinen Ort auf der Erde der nicht von Klimagefahren wie Hitzewellen Dürren Überschwemmungen und dem Anstieg des Meeresspiegels bedroht ist Der Verlust der Artenvielfalt und der Klimawandel sind eng miteinander verknüpft Schwerwiegende Auswirkungen auf die Gesundheit der Menschen weltweit sind die Folgen Dem kann und muss jedoch entgegengewirkt werden Für die zwingend erforderliche gelingende Wende liegt eine Fülle von Konzepten vor Gelingt es auf politischer wirtschaftlicher sozialer und privater Ebene national wie international entschlossen zu entscheiden und vor allem zu handeln kann unsere Erde auch in Zukunft ein lebenswerter Ort für alle bleiben Dieses interdisziplinär angelegte Mut machende Buch bietet wissenschaftlich basierte Analyse und eine Fülle von Ansätzen zum Umgang mit der globalen Krise des Klimas und dem Schwund der Artenvielfalt Es ermutigt Lesende angstfrei motiviert und gestaltend Artenvielfalt zu mehr und Klimafolgen abzumildern Herausgeber und Autor innen bieten fundierte Informationen u a zu den Themen Klimawandel

Die Welt, der Wandel und ich Maike Sippel, 2025-09-15 Wie kann der Wandel in die Welt kommen mit dem wir eine enkeltaugliche Zukunft sichern Und was hat dieser Wandel mit mir zu tun In Zeiten grundlegender Veränderungen zeigt Maike Sippel Professorin für Nachhaltigkeit warum wir nicht hilflos auf Weichenstellungen der Politik warten müssen Es ist an der Zeit selbst die Segel zu setzen Maike Sippel entwirft einen Plan wie wir den gesellschaftlichen Wandel wahrscheinlicher machen und zugleich unsere Resilienz stärken Sie präsentiert zwölf mutige Gedanken um die Welt zu verändern mit Kopf Herz und Hand Positiv und dogmatisch und konkret das Handbuch für die Abenteuerreise des Wandels Wissenserwerb zum Thema Klimapolitik aus Mediennutzung und interpersoneller Kommunikation Fenja De Silva-Schmidt, 2021-01-01 Ein Basiswissen über Klimapolitik ermöglicht demokratische Teilhabe und Engagement für den Klimaschutz Bestehende Studien zum Wissen der Deutschen konzentrieren sich jedoch entweder auf Folgen und Ursachen des Klimawandels oder auf andere

Politikbereiche Zudem gibt es wenig Forschung zu den Quellen und dem Prozess des Wissenserwerbs Daher untersucht die vorliegende Studie welchen Beitrag Mediennutzung und interpersonelle Kommunikation zum Wissenserwerb der Klimapolitik leisten und welche anderen Faktoren neben den Informationsquellen das Lernen beeinflussen und erklären Die Studie wurde im Kontext des UN Klimagipfels 2015 in Paris durchgeführt und kombiniert eine dreiwellige Panel Befragung der deutschen Bevölkerung N 1121 mit einer qualitativen Tagebuchbefragung N 42 und einer qualitativen Inhaltsanalyse der genutzten Medieninhalte der TagebuchschreiberInnen Es zeigt sich ein eher niedriger Wissensstand mittelfristig gibt es einen Lerneffekt in Bezug auf besonders aktuelle Aspekte des Themas Der Wissenserwerb wird durch einen Deckeneffekt limitiert der zu einem großen Teil aus einer inhaltlich eingeschränkten Berichterstattung resultiert *Lernziele und Kompetenzen im Bereich Nachhaltigkeit* Walter Leal Filho, 2024-03-15 Das Buch zeigt Ihnen wie sich Lernziele und Kompetenzen im Bereich Nachhaltigkeit ergattern und hilft die komplexe und vernetzte Natur der Nachhaltigkeit besser zu verstehen und die damit verbundenen Herausforderungen zu erkennen und anzugehen Dazu gehört auch die Vermittlung von Kenntnissen über die verschiedenen Aspekte der Nachhaltigkeit wie z B ökologische soziale und wirtschaftliche Aspekte sowie deren Wechselwirkung miteinander Darüber hinaus zeigt das Buch auf wie Sie die möglichen Auswirkungen von Entscheidungen und Maßnahmen auf die Nachhaltigkeit einschätzen und bewerten können Das Buch beschreibt die Zusammenhänge zwischen Nachhaltigkeit und Lernen Es wird erläutert wie Bildung und Lernen im Bereich der Nachhaltigkeit uns helfen können die natürliche Welt und unsere Beziehung zu ihr zu verstehen und bessere Entscheidungen zu treffen um unser Leben und die Umwelt zu verbessern Es untersucht auch die Rolle von Technologie und Bildung im Bereich der Nachhaltigkeit und erkundet wie Nachhaltigkeit in den Unterricht und das Lernen integriert werden kann Schließlich enthält das Buch praktische Ratschläge zur Schaffung eines nachhaltigen Lernumfelds und zur Anwendung von Nachhaltigkeit in der Hochschulbildung und in den unteren Bildungsstufen Handbuch Kindheit, Ökologie und Nachhaltigkeit Rita Braches-Chyrek, Charlotte Röhner, Jo Moran-Ellis, Heinz Sünker, 2023-11-13 Mit dem Fokus auf Orte und Kontexte des Lebens von Kindern bringt dieses Handbuch Beiträge zusammen die unterschiedlichste soziale Konstellationen die für kindliches Leben und Erleben wichtig sind untersuchen Diese werden analog zu aktuellen Fragen von Ökologie Nachhaltigkeit und Naturbezug diskutiert da Kinder nicht nur die Zukunft verkörpern sondern stetig die Folgen ökologischer Probleme erleben und von diesen besonders betroffen sind **What We Think About When We Try Not To Think About Global Warming** Per Espen Stoknes, 2015 Today about 98 percent of scientists affirm that climate change is human made and about 2 percent still question it Despite that overwhelming majority though about half the population of rich countries like ours choose to believe the 2 percent And paradoxically this large camp of deniers grows even larger as more and more alarming proof of climate change has cropped up over the last decades This disconnect has both climate scientists and activists scratching their heads growing anxious and responding usually by repeating more facts to win the argument But the more climate facts pile up the greater the resistance

to them grows and the harder it becomes to enact measures to reduce greenhouse gas emissions and prepare communities for the inevitable change ahead Is humanity up to the task It is a catch 22 that starts says psychologist and climate expert Per Espen Stoknes from an inadequate understanding of the way most humans think act and live in the world around them With dozens of examples he shows how to retell the story of climate change and apply communication strategies more fit for the task Publisher s description

Climate Change and the Endurance of Democracy Daniel Lindvall,2024-11-26 This book explores the challenges climate change poses to the endurance of democracy situating this theme within the context of the decline in global freedom documented since the early 21st century It discusses how disaster events have historically affected human reasoning and agency and how the climate crisis is likely to influence democratic development in the future Climate extreme events can provide opportunities for autocratic leaders to curtail rights and freedoms but they can also create critical junctures where the social and political discourse within society is reshaped and where incumbent regimes are contested The book illustrates how climate change may generate food insecurity economic recessions and deepen socioeconomic inequalities These effects may contribute to democratic backsliding but can also create new conditions for social mobilization The democratic consequences of climate change are thus not primarily determined by the forces of nature but by human responses and the social economic and political conditions of the affected country In the long term perspective however climate change will have several negative effects on democratic stability The book concludes that for human freedom and democracy to endure modern society needs to be brought into balance with nature This volume will be of great interest to students and scholars of climate governance environmental politics energy policy and global development

Indigenous Knowledges and the Sustainable Development Agenda Anders Breidlid,Roy Krøvel,2020-04-17 This book discusses the vital importance of including indigenous knowledges in the sustainable development agenda In the wake of colonialism and imperialism dialogue between indigenous knowledges and Western epistemology has broken down time and again However in recent decades the broader indigenous struggle for rights and recognition has led to a better understanding of indigenous knowledges and in 2015 the Sustainable Development Goals SDGs outlined the importance of indigenous engagement in contributing to the implementation of the agenda Drawing on experiences and field work from Africa Asia Latin America and Europe Indigenous Knowledges and the Sustainable

Crisis and the Culture of Fear and Anxiety in Contemporary Europe Carmen Zamorano Llena, Jonas Stier, Billy Gray, 2023-08-01 The accrual of crises over the last two decades with their particular manifestations in the European context has evoked the feeling of living in exceptional times as captured in the recurrent claim that we live in the age of anxiety The main aim of this collection is to analyse from a multidisciplinary perspective the causes and consequences of the current dominance of the discourse of fear anxiety and crisis through the experience of distinct and often interdependent moral panics in twenty-first century Europe With its multidisciplinary approach this volume sheds light on the need to view the interrelationship between different crises and their associated affects as crucial in attaining a more nuanced understanding of the aetiology and effects of the current age of anxiety This multidisciplinary scrutiny of the interrelationship of twenty-first century fears anxiety and crises signals an original engagement with these complex phenomena in order to make their emergence and profound effects on contemporary society more comprehensible The timeliness of the thematic focus and the rigorous in-depth analyses make this collection relevant to students and academics within the fields of sociology literary and cultural studies political science and anthropology as well as to those in European studies and global studies

Elemental-Embodied Thinking for a New Era Lenart Škof, Sashinungla, Sigríður Thorgeirsdóttir, 2024-05-03 This collection responds to widespread complex and current environmental challenges by presenting eleven original essays on a new elemental embodied approach in environmental humanities This approach has a special focus on elemental and indigenous philosophies as well as localized experiences of terrestrial forces from earthquakes and eruptions to pandemics and natural disasters Representing a shift in modern Western scientific and

disembodied thinking of nature this edited book approaches the question of relationality and intertwining of human and natural being by utilizing the elemental embodied methodologies within philosophy of embodiment and nature Supported by research in cognitive sciences the contributors represent the experiential and affective turn within research into human cognition As embodied the human being is embedded and interacting with all there is The aim of this edited volume is to indicate new paths toward regaining our access to natural being within us and thus toward reconnecting with the natural environment and the things and beings around us in a new environmentally enhanced way It appeals to researchers and students working in many fields predominantly in philosophy as well as religious and environmental studies

examples it introduces key concepts and frameworks for understanding the multifaceted connections between climate and society Robin Leichenko and Karen O'Brien frame climate change as a social issue that calls for integrative approaches to research policy and action They explore dominant and relevant discourses on the social drivers and impacts of climate change highlighting the important roles that worldviews and beliefs play in shaping responses to climate challenges Situating climate change within the context of a rapidly changing world the book demonstrates how dynamic political economic and environmental contexts amplify risks yet also present opportunities for transformative responses Aimed at undergraduate students and others concerned with a critical challenge of our time this informative and engaging book empowers readers with a range of possibilities for equitable and sustainable transformations in a changing climate **Eco-anxiety and**

Pandemic Distress Douglas A. Vakoch, Sam Mickey, 2023 Through much of 2020 and into 2021 nations throughout the world locked down because of the COVID 19 pandemic Before then the most pressing global anxiety for many people was climate anxiety However these phenomena are in many ways interconnected Many of the elements in the global economic and logistical systems cause both ecological problems and vulnerability to pandemics When pandemics happen they influence ecological problems for better or worse In turn ecological dynamics shape pandemics **Liberalism and the Challenge of**

Climate Change Christopher Shaw, 2023-08-25 In this book Christopher Shaw analyses how liberalism has shaped our understanding of climate change and how liberalism is legitimated in the face of a crisis for which liberalism has no answers The language and symbolism we use to make sense of climate change arose in the post World War II liberal institutions of the West This language and symbolism in neutralising the philosophical and ideological challenge climate change poses to the legitimacy of free market liberalism has also closed off the possibility of imagining a different kind of future for humanity The book is structured around a repurposing of the guardrail concept commonly used in climate science narratives to communicate the boundary between safe and dangerous climate change Five discursive guardrails are identified which define a boundary between safe and dangerous ideas about how to respond to climate change The theoretical treatment of these issues is complemented with data from interviews with opinion formers decision makers and campaigners exploring what models of human nature and political possibilities guide their approach to the politics of climate change governance This book will be of great interest to students and scholars of climate change liberal politics environmental communication and environmental politics and philosophy in general **Alleviating World Suffering** Ronald E. Anderson, 2017-03-01 This

is the first volume on the subject of the alleviation of world suffering At the same time it is also the first book framing the fields of global socio economic development world health human rights peace studies sustainability and poverty within the challenge of alleviating suffering and improving quality of life Both international studies and global development have become specialized and fragmented whereas this work assembles all of these development fragments together in order to determine whether common ground exists to make headway in reducing global suffering Leading experts in these various

fields of development and suffering have been recruited worldwide to give scholarly assessments of the major human problems and how they can be successfully tackled
