manned aircraft and on the ground as well as the various ways in which this new technology may reduce risk and save lives sometimes in ways that cannot readily be accounted for with current safety assessment processes This report examines the various ways that risk can be defined and applied to integrating these Unmanned Aircraft Systems UAS into the National Airspace System managed by the Federal Aviation Administration FAA It also identifies needs for additional research and developmental opportunities in this field Math: a Crash Course Brian/Morris Peet Clegg,Peet Morris,2019-07-30 It s a sad truth that math has the reputation of being difficult Part of the problem is that many of us simply don t speak the language To a mathematician an equation is a compact efficient way to put across a relationship that would be far less comprehensible in words But to many of us the merest sign of an x y or symbol is an impenetrable mess that our eyes bounce off This book provides an engaging overview of what math is and what it can do without having to solve simultaneous equations or prove geometric theorems far more of us might get the point of it It is divided into four chapters each covering a major developmental route in the topic from Arithmetic Numbers to Geometry and from Algebra Calculus to Applied Mathematics
