Trading Strategies Andrew Rich, 2020-11-04 Are you eager to join the world of trading Want to start making money without breaking a sweat If yes then keep reading Would it not be great to have a successful business and be your own boss Just sit back and watch your money grow as the business succeeds Does this sound like a daydream It might but this dream is closer to reality than one might imagine The world of trading is diverse and full of different possibilities and chances One of the best things about the trading world is that there is a place for everyone Whether you re a beginner or have been investing for years have long or short term goals or simply just want to experiment a bit you will definitely find something suitable for you However it is essential to understand that this isn t a get rich quick scheme where you re going to make millions overnight You will first need to educate yourself about its different aspects set your goals and choose what you want to invest in Becoming successful in the trading world requires hard work dedication and a proper understanding of its

different aspects Most people choose to keep their money in the bank to save it A bank is an attractive option for people because it is safe The buying and selling of stocks however involves risk You could buy a stock today and the value of the stock could decline or worse the company might go bankrupt If a company goes out of business then your shared ownership would be worthless and all the money you had invested would be gone On the other hand if you choose the right stocks and buy them at the right time then their value could go up By the time you sell the stock you will have made a profit The advantage of investing in the stock forex and options market rather than investing in a bank is the chance to profit from your investment When you keep your money in a bank very little value is added to the money over time Banks will pay interest rates but nowadays interest rates are so low that they don't manage to keep up with inflation Often we associate inflation with the increase in the money supply making things more expensive and our money less valuable In economics inflation is the gradual increase in the prices of goods and services over time Over time things become more expensive which means the dollar amount to purchase x item increases A small amount of inflation is good for the economy because it makes the loans you have to repay less expensive over time But if we just keep our money sitting in the bank then the value of our money won't keep up with the rate of inflation In this bundle you will learn strategies of trading and investing for a living The following books are covered in more details Forex trading Day trading Swing trading Futures trading Does it sound too good to be true Let's get to facts and prove the benefits to you Just Click Buy now and start your new life today
