Transmitting the Past J. Emmett Winn,Susan Lorene Brinson,2005-03-20 The essays included in this collection represent some of the best cultural and historical research on broadcasting in the U S today Each one concentrates on a particular event in broadcast history beginning with Marconi s introduction of wireless technology in 1899 Michael Brown examines newspaper reporting in America of Marconi s belief in Martians stories that effectively rendered Marconi inconsequential to the further development of radio The widespread installation of radios in automobiles in the 1950s Matthew Killmeier argues paralleled the development of television and ubiquitous middle class suburbia in America Heather Hundley analyzes depictions of male and female promiscuity as presented in the sitcom Cheers at a time concurrent with media coverage of the AIDS crisis Fritz Messere examines the Federal Radio Act of 1927 and the clash of competing ideas about what role radio should play in American life Chad Dell recounts the high brow programming strategy NBC adopted in 1945 to distinguish itself from other networks And George Plasketes studies the critical reactions to Cop Rock an ill fated combination of police drama and musical as an example of society s resistance to genre mixing or departures from formulaic programming J Emmett Winn is Associate Professor of Communication and Journalism at Auburn University Susan L Brinson is Professor of Communication and Journalism at Auburn University and author of The Red Scare Politics and the Federal Communications Commission Hunting Down Social Darwinism Stuart K. Hayashi,2015-02-17 Hunting Down Social Darwinism is the third and final installment in the trilogy The Nature of Liberty The trilogy gives a secular ethical defense of laissez faire capitalism inspired by Ayn Rand s ideas The trilogy s first book The Freedom of Peaceful Action provided the philosophic theory behind the ethics of a free enterprise system based on the individual rights to life liberty and private property which John Locke described The second installment Life in the Market Ecosystem explained how free enterprise functions much as a natural ecosystem wherein behavioral norms develop bottom up from repeat interactions among individual participants in the economy As such defenses of free enterprise are frequently criticized as social Darwinism however this third and final installment of the trilogy asks the question What is social Darwinism The book embarks on a hunt

for the term's meaning explores social Darwinism's beginnings and examines whether it is fair to describe such nineteenth century free market advocates as Herbert Spencer and William Graham Sumner as social Darwinists. It then addresses the accusation that the free market Darwinism commonly ascribed to Spencer and Sumner rationalized bigotry and founded the pseudoscience of eugenics. In the process, the book refutes various myths about the topic popularized by such scholars as Richard Hofstadter and John Kenneth Galbraith. The extent to which the popular narratives about social Darwinism prove to be inaccurate holds enormous ramifications for current controversies. It has implications for debates over the ethical appropriateness of reducing taxpayer spending on social welfare programs and also sheds new light on the pros and cons of attempts to apply biological evolutionary theory to the study of human social institutions. Additionally discussed is the manner in which various prominent figures in economics, evolutionary psychology, and Complexity Theory have grown famous for advancing ideas which Spencer and Sumner originated, even as such figures simultaneously downplay the importance of Spencer and Sumner to their field. Following the hunt for social Darwinism, this work sums up the trilogy with some final thoughts on the importance that liberty holds for every effort to live life to the fullest.

Conspiracies and Secret Societies Brad Steiger, Sherry Hansen Steiger, Kevin Hile, 2022-09-27. The invisible world of influence and power revealed. Hidden agendas uncovered. Made in Brooklyn Amanda Wasielewski, 2018-06-29 *Made in Brooklyn* provides a belated critique of the Maker Movement from its origins in the nineteenth century to its impact on labor and its entanglement in the neoliberal economic model of the tech industry This critique is rooted in a case study of one neighborhood in Brooklyn where artists occupy former factory buildings as makers Although the Maker Movement promises to revitalize the city and its dying industrial infrastructure by remaking these areas as centers of small scale production it often falls short of its utopian ideals Through her analysis of the Maker Movement the author addresses broader questions around the nature of artistic work after the internet as well as what the term hipster means in the context of youth culture gentrification labor and the influence of the internet Part history part ethnography this book is an attempt to provide a unified analysis of how the tech industry has infiltrated artistic practice and urban space

Power-Lined Daniel L. Wuebben, 2019-07-01 The proliferation of electric communication and power networks have drawn wires through American landscapes like vines through untended gardens since 1844 But these wire networks are more than merely the tools and infrastructure required to send electric messages and power between distinct places the iconic lines themselves send powerful messages The wiry webs above our heads and the towers rhythmically striding along the horizon

symbolize the ambiguous effects of widespread industrialization and the shifting values of electricity and landscape in the American mind In *Power Lined* Daniel L Wuebben weaves together personal narrative historical research cultural analysis and social science to provide a sweeping investigation of the varied influence of overhead wires on the American landscape and the American mind Wuebben shows that overhead wires from Morse's telegraph to our high voltage grid not only carry electricity between American places but also create electrified spaces that signify and complicate notions of technology nature progress and most recently renewable energy infrastructure *Power Lined* exposes the subtle influences wrought by the wiring of the nation and shows that even in this age of wireless devices perceptions of overhead lines may be key in progressing toward a more sustainable energy future **Technology, Literature and Culture** Alex Goody, 2013-04-25

Technology Literature and Culture provides a detailed and accessible exploration of the ways in which literature across the twentieth century has represented the inescapable presence and progress of technology As this study argues from the Fordist revolution in manufacturing to computers and the internet technology has reconfigured our relationship to ourselves each other and to the tools and material we use The book considers such key topics as the legacy of late nineteenth century technology the literary engagement with cinema and radio the place of typewriters and computers in formal and thematic literary innovations the representations of technology in spy fiction and the figures of the robot and the cyborg It considers the importance of broadcast technology and the internet in literature and covers major literary movements including modernism cold war writing postmodernism and the emergence of new textualities at the end of the century An insightful and wide ranging study *Technology Literature and Culture* offers close readings of writers such as Virginia Woolf Samuel Beckett Ian Fleming Kurt Vonnegut Don DeLillo Jeanette Winterson and Shelley Jackson It is an invaluable resource for students and scholars alike in literary and cultural studies and also introduces the topic to a general reader interested in the role of technology in the twentieth century *The Grid* Julie A Cohn, 2018-02-02 The history of the grid the world's largest interconnected power machine that is North America's electricity infrastructure The North American power grid has been called the world's largest machine The grid connects nearly every living soul on the continent Americans rely utterly on the miracle of electrification In this book Julie Cohn tells the history of the grid from early linkages in the 1890s through the grid's maturity as a networked infrastructure in the 1980s She focuses on the strategies and technologies used to control power on the grid in fact made up of four major networks of interconnected power systems paying particular attention to the work of engineers and system operators who handled the everyday operations To do so she consulted sources that range from the pages of historical trade journals to corporate archives to the papers of her father Nathan Cohn who worked in the industry from 1927 to 1989 roughly the period of key power control innovations across North America Cohn investigates major challenges and major breakthroughs but also the hidden aspects of our electricity infrastructure both technical and human She describes the origins of the grid and the growth of interconnection emerging control issues including difficulties in

matching generation and demand on linked systems collaboration and competition against the backdrop of economic depression and government infrastructure investment the effects of World War II on electrification postwar plans for a coast to coast grid the northeast blackout of 1965 and the East West closure of 1967 and renewed efforts at achieving stability and reliability after those two events *Imagining the World into Existence* Normandi Ellis,2012-07-12 Reveals the secret language and words of power that enabled the ancient Egyptians to imagine the world into existence Reveals ancient Egyptian Mystery teachings on immaculate conception transubstantiation resurrection and eternal life Explores the shamanic journeys that ancient Egyptian priests used to view the unconscious and the afterlife Provides the essential spiritual tools needed to return to Zep Tepi the creative source Drawing from the Egyptian Book of the Dead the Pyramid texts the Book of Thoth and other sacred hieroglyphic writings spanning the three millennia of the Egyptian Mystery Traditions Normandi Ellis reveals the magical language of creation and words of power that enabled the ancient Egyptians to act as co creators with the gods Examining the power of hieroglyphic thinking how thoughts create reality and the multiple meanings behind every word of power the author shows how with the Neteru we imagine the world into existence casting a spell of consciousness over the material world Uncovering the deep layers of meaning and symbol within the myths of the Egyptian gods and goddesses Ellis investigates the shamanic journeys that ancient Egyptian priests used to view the unconscious and the afterlife and shares their initiations for immaculate conception transubstantiation resurrection and eternal life initiations that later became part of the Christian mystery school Revealing the words of power used by these ancient priests sorcerers she explains how to search for the deeper hidden truths beneath their spells and shows how ancient Egyptian consciousness holds the secret of life itself Revealing the initiatory secrets of the Osirian Mystery school Ellis provides the essential teachings and shamanic tools needed to return to Zep Tepi the creative source as we face the transitional time of radical change currently at hand **The Martians** David Baron,2025-08-26 Long before NASA began contemplating a visit to our neighboring world a turn of the century Mars craze invaded the public s imagination here thrillingly retold in David Baron s *The Martians* There Is Life on the Planet Mars New York Times December 9 1906 This New York Times headline was no joke In the early 1900s many Americans actually believed we had discovered intelligent life on Mars as best selling science writer David Baron chronicles in *The Martians* his truly bizarre tale of a nation swept up in Mars mania At the center of Baron s historical drama is Percival Lowell the Boston Brahmin and Harvard scion who observed canals etched into the surface of Mars Lowell devised a grand theory that the red planet was home to a utopian society that had built gargantuan ditches to funnel precious meltwater from the polar icecaps to desert farms and oasis cities The public fell in love with the ambitious amateur astronomer who shared his findings in speeches and wildly popular books While at first people treated the Martians whimsically Martians headlining Broadway shows biologists speculating whether they were winged or gilled the discussion quickly became serious Inventor Nikola Tesla announced he had received radio signals from Mars Alexander Graham Bell

agreed there was no escape from the conviction that intelligent beings inhabited the planet Martian excitement reached its zenith when Lowell financed an expedition to photograph Mars from Chile's Atacama Desert resulting in what newspapers hailed as proof of the Martian canals existence Triumph quickly yielded to tragedy Those wild claims and highly speculative photographs emboldened Lowell's critics whose withering attacks gathered steam and eventually wrecked the man and his theory but not the fervor he had started Although Lowell would die discredited and delusional in 1916 the Mars frenzy spurred a nascent literary genre called science fiction and the world's sense of its place in the universe would never be the same Today the red planet maintains its grip on the public's imagination Many see Mars as civilization's destiny the first step toward our becoming an interplanetary species but as David Baron demonstrates this tendency to project our hopes onto the world next door is hardly new The Martians is a scintillating and necessary reminder that while we look to Mars for answers what we often find are mirrors of ourselves

Addicted to the Sun Captain Leo Walton, 2021-03-24 As a direct result of an accidental electrocution while working on the 220 AC shore power system aboard his boat Captain Leo Walton had an event which changed his life forever Not only did the powerful electricity catapult him physically threw the air twelve feet it entered his left hand using his own nerves as a conduit to enter his brain causing a severe traumatic brain injury In less than

a second he fell into unconsciousness and began a journey that he did not choose or volunteer For a period of three weeks alone he cycled in and out of consciousness not realizing that the damage to his brain and the left side of his body would demand of him to relearn how to speak to walk to read to feel and literally to be lost struggling to find himself As he recovered having been a successful marine forensics investigator he became obsessed with his own recovery Learning quickly how fast it is today in the factory of medicine that exists in America he found himself on six prescription medications some psychotic in nature to replace the chemical compounds his crippled pineal and pituitary glands could no longer provide Suffering the losses of business marriage and the ability to care and provide for himself he fell into cycles of anger and despair to the point of a well planned and luckily uncompleted suicide Having developed significant physical emotional and psychological symptoms he learned of a renegade bio electric energy known by the ancients as a sudden Kundalini awakening that he determined was the cause of his suffering Without any great success with modern western medicine he became an explorer of alternative methods and found himself investigating many ancient methods of healing such as yoga reiki qi gong and meditation which in time sungazing became his primary focus This volume details three experiments taken from Captain Leo s personal and detailed journals about his two sungazing experiments requiring nineteen months and three hundred forty four days totaling an incredible a hundred fifty three hours of staring naked eyed at the sun gaining the superhuman ability to stare at the sun for forty five minutes duration Now convinced his theories were correct as a result of his sungazing experiments and information he learned from a thorough investigation of Nikola Tesla s life and habits this led him to duplicate Tesla s habits and participate once more in an experiment to see how long he could go without eating food and remain alive and healthy This led to a tenacious ninety days living as a breatharian to prove his beliefs Learn why Captain Leo affectionately named this The Book of Miracles [Listening, Thinking, Being](#) Lisbeth Lipari,2015-12-07

Although listening is central to human interaction its importance is often ignored In the rush to speak and be heard it is easy to neglect listening and disregard its significance as a way of being with others and the world Drawing upon insights from phenomenology linguistics philosophy of communication and ethics Listening Thinking Being is both an invitation and an intervention meant to turn much of what readers know or think they know about language communication and listening inside out It is not about how to be a good listener or the numerous pitfalls that stem from the failure to listen Rather the purpose of the book is first to make readers aware of the value and importance of listening as a fundamental human ability inextricably connected with language and thought second to alert readers to the complexity of listening from personal cultural and philosophical perspectives and third to offer readers a way to think of listening as a mode of communicative action by which humans create and abide in the world Lisbeth Lipari brings together historical literary intercultural scientific musical and philosophical perspectives as well as a range of her own personal experiences to produce this highly readable analysis of how the human experience of being as an ethical relation with others is enacted by means of listening
