Mr. Mothercountry Keally McBride,2016-08-03 Today every continent retains elements of the legal code distributed by the British empire The British empire created a legal footprint along with political economic cultural and racial ones One of the central problems of political

theory is the insurmountable gap between ideas and their realization Keally McBride argues that understanding the presently fraught state of the concept of the rule of law around the globe relies upon understanding how it was first introduced and then practiced through colonial administration as well as unraveling the ideas and practices of those who instituted it The astonishing fact of the matter is that for thirty years between 1814 and 1844 virtually all of the laws in the British Empire were reviewed approved or discarded by one individual James Stephen disparagingly known as Mr Mothercountry Virtually every single act that was passed by a colony made its way to his desk from a levy to improve sanitation to an officer s pay to laws around migration and immigration and tariffs on products Stephen great grandfather of Virginia Woolf was an ardent abolitionist and he saw his role as a legal protector of the most dispossessed When confronted by acts that could not be overturned by reference to British law that he found objectionable he would make arguments in the name of the natural law of justice and equity He truly believed that law could be a force for good and equity at the same time that he was frustrated by the existence of laws that he saw as abhorrent In Mr Mothercountry McBride draws on original archival research of the writings of Stephen and his descendants as well as the Macaulay family two major lineages of legal administrators in the British colonies to explore the gap between the ideal of the rule of law and the ways in which it was practiced and enforced McBride does this to show that there is no way of claiming that law is always a force for good or simply an ideological cover for oppression It is both Her ultimate intent is to illuminate the failures of liberal notions of legality in the international sphere and to trace the power disparities and historical trajectories that have accompanied this failure This book explores the intertwining histories of colonial power and the idea of the rule of law in both the past and the present and it asks what the historical legacy of British Colonialism means for how different groups view international law today

The Climate of History in a Planetary Age Dipesh Chakrabarty, 2021-03-22 For the past decade historian Dipesh Chakrabarty has been one of the most influential scholars addressing the meaning of climate change Climate change he argues upends long standing ideas of history modernity and globalization The burden of The Climate of History in a Planetary Age is to grapple with what this means and to confront humanities scholars with ideas they have been reluctant to reconsider from the changed nature of human agency to a new acceptance of universals Chakrabarty argues that we must see ourselves from two perspectives at once the planetary and the global This distinction is central to Chakrabarty s work the globe is a human centric construction while a planetary perspective intentionally decenters the human Featuring wide ranging excursions into historical and philosophical literatures The Climate of History in a Planetary Age boldly considers how to frame the human condition in troubled times As we open ourselves to the implications of the Anthropocene few writers are as likely as Chakrabarty to shape our understanding of the best way forward

Media, Politics and Environment Detlef Briesen, Sarada Prasanna Das, 2023-07-15 Environmental protection has not equally established itself as a permanent fixture in the political systems of all countries to date governments and entire societies have responded to

environmental challenges in a variety of ways and concrete environmental policy is still a highly national matter Moreover the perception of environmental problems varies considerably on a global scale The reasons normally cited for these differences largely stem from the environmental policy debates themselves e g poverty ignorance capital interests etc In contrast this book shows that concrete environmental policy emerges from a complex interplay of mass media and political conflicts first the mass media provide the framework for national environmental policy through agenda setting framing and scandalization second the mass media thereby change values in the political and social discourse e g by altering the perception of global commons and expanding the possibilities of interest articulation and third this can lead to political decision making processes in which legal and other measures for environmental protection are enforced The book systematically compares industrialized countries such as Germany and Japan with several rapidly emerging countries in South and Southeast Asia
