Schulbuch und religiöse Vielfalt Zrinka Stimac, Riem Spielhaus, 2018 Wie wird Religion in Bildung und Schulbuch präsentiert Religionsbezogene Analysen in Geschichts Ethik und Religionsschulbüchern unterschiedlicher Länder ergeben hinsichtlich der Konstruktion religiöser Vielfalt ein disparates Bild Deutlich wird allerdings dass alle Schulbücher im Hinblick auf religiöse und weltanschauliche Vielfalt vor ähnlichen Herausforderungen stehen Eine Reihe von Beiträgen zeigt dass Religionen in Bildungsmedien bisher nicht in ihren Wandlungen in den Blick genommen werden und die Grenzziehung zwischen Religion und Nicht-Religion unterbestimmt bleibt Klar wird auch dass die Debatte um den angemessenen Bildungszugang zu Religion in demokratischen Gesellschaften wieder an Dynamik gewonnen hat *Hong Kong in Revolt* Au Loong-Yu, 2020-08-20 Hong Kong is in turmoil with a new generation of young and politically active citizens shaking the regime From the Umbrella Movement in 2014 to the defeat of the Extradition Bill and beyond the protestors demands have become more radical and their actions more drastic Their bravery emboldened the labor movement and launched the first successful political strike in half a century followed by the broadening of the democratic movement as a whole The book also sets the new protest movements within the context of the colonization revolution and modernization of China Au Loong Yu explores Hong Kong's unique position in this history and the reaction the protests have generated on the Mainland But the new generation's aspiration goes far beyond the political It is a generation that strongly associates itself with a Hong Kong identity with inclusivity and openness Looking deeper into the roots and intricacies of the movement the role of Western Values vs Communism and Hong Kongness vs Chineseness the cultural and political battles are understood through a broader geopolitical history For good or for bad Hong Kong has become one of the battle fields of the great historic contest between the US the UK and China **Colonial Discourse and the Suffering of Indian American Children** Kundan Singh, Krishna Maheshwari, 2024-04-26 Euro American misrepresentations of the non West in general and in particular on Hinduism and ancient India run deep and have far greater colonial connections than that have been exposed in academia This book analyzes the psycho social consequences that Indian American children face after they are exposed to the school textbook discourse on Hinduism and ancient India The authors show that there is an intimate connection an almost exact correspondence between James Mill's colonial racist discourse and the current school textbook discourse The very parameters and coordinates on which James Mill constructed the discourse are the ones that are being used to describe Hinduism Hindus and ancient India in the textbooks currently Consequently this archaic and racist discourse camouflaged under the cover of political correctness produces in the Indian American children a psychological impact quite similar to what racism is known to produce shame inferiority embarrassment identity confusion assimilation and a phenomenon similar to racelessness where the children dissociate from the tradition and culture of their ancestors This book argues that the current school textbook discourse on Hinduism and India needs to change so that the Indian American children do not

become victims of overt and covert racism For the change to occur the first step is to recognize the overarching and pervasive influence of the colonial racist discourse of James Mill on the textbooks For the reconstruction of the discourse to take place the first step is to engage in a thorough deconstruction which is what the book attempts **The New Politics of the Textbook** Heather Hickman,Brad J. Porfilio,2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural axes of race class gender sexuality and dis ability Several contributors also generate critical insight in how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production Economic Principles for the Hospitality Industry Ricardo C.S. Siu,2019-06-27 Economic Principles for the Hospitality Industry is the ideal introduction to the fundamentals of economics in this dynamic and highly competitive sector Applying economic theory to a range of diverse and global hospitality industry settings this book gives the theory real world context Looking at critical issues around sustainable economic development in the hospitality industry such as diversification technology determinants of demand and pricing it enables students to effectively conduct business analyses evaluate business performance and conduct effective improvements over time Written in an engaging style this book assumes no prior knowledge of economics and contains a range of features including international case studies and discussion questions to aid beginners in the subject This will be an essential introductory yet comprehensive resource on economics for all hospitality students **Richard M. Nixon and European Integration** Joseph M. Siracusa, Hang Thi Thuy Nguyen,2018-04-13 This book re examines the Nixon administration s attitude and approach to the European integration project The formulation of US policy towards European integration in the Nixon presidential years 1969 1974 was conditioned by the perceived relative decline of the United States Western European emergence and competition the feared Communist expansionism and US national interests Against that backdrop the Nixon administration saw the need to re evaluate its policy on Western Europe and the integration process on this continent Underpinning this study is the extensive use of newly released archival materials from the Nixon Presidential Library and Museum the Library of Congress and the State Department Furthermore the work is based on the public papers in the American Presidency

Project and the materials on the topic of European integration and unification in the Archive of European Integration Finally the study has extensively used newspaper archives as well as the declassified online documents memoirs and diaries of former US officials Mining these sources made it possible to shed new light on the complexity and dynamism of the Nixon administration s policy towards European integration *International Studies* Stanley W Toops, Mark Allen Peterson, Sheldon Anderson, 2018-04-24 This core text is the first to provide a much needed interdisciplinary approach to international studies Emphasizing the interconnected nature of history geography anthropology economics and political science International Studies details the methodologies and subject matter of each discipline then applies these discipline lenses to seven regions Europe East Asia and the Pacific South and Central Asia sub Saharan Africa the Middle East and North Africa Latin America and North America This disciplinary and regional combination provides an indispensable cohesive framework for understanding global issues The fully updated fourth edition includes four new global issues chapters The Refugee Crisis in Europe The Syrian Civil War and the Rise of the Islamic State Global Climate Change and The Globalization of Modern Sports **The Origins of the Criminal Justice System** Omi Hodwitz, 2025-02-18 The Origins of the Criminal Justice System Historical Explorations by the Justice Involved provides an introduction to the historical roots of modern day Western systems of justice The text addresses different aspects of criminal justice including chapters on police courts corrections and trends in crime and punishment as well as chapters that examine the relationship between justice practices and select communities defined by gender age class and race Each chapter begins in Ancient Antiquity before progressing to the Middle Ages the Renaissance and Age of Enlightenment and concluding in the Modern Era Readers are introduced to the social and political factors evident at the time the structure and function of each era specific system and the execution and consequences of early policies and procedures The book provides an important and detailed examination of the evolution of justice practices tying these temporal threads to modern systems and offers the readership the opportunity to observe institutions across the millennia Whether it is jury trials in Ancient Greece or ordeals in the Dark Ages the reader is invited to traverse the world of criminal justice practices replete with eras of inspiration as well as intolerance and cruelty Karl Popper and Africa: Knowledge, Politics and Development Oseni Taiwo Afisi, 2021-09-13 This book provides a diverse contextualization of Popper s critical rationalism concerning knowledge and his generalized attitude of criticism on appropriate social and political reforms in contemporary Africa The book evaluates how best to address contemporary political problems especially in politically very troubled parts of the world To address these contemporary problems especially as it relates to Africa the authors found the political philosophy of Popper as suitable The discussion of Popper s political philosophy engages us directly with all the particularities of socio economic and political problems within contemporary Africa In other words it presents the truth of the present socio political reality in Africa where the question of what kinds of political ideas and concepts can be offered as appropriate to a political environment which so greatly faces

facets of developmental issues Although the issues and events that informed the writings of Popper s *The Poverty of Historicism* as well as *The Open Society and Its Enemies* were among others the rise of fascism and communism in Europe the inventiveness of this work is how happily scholars in non liberal societies such as in Africa can pick up Popper s insights and usefully work with them to offer appropriate social reforms for their society This volume is a critical juxtaposition of Popper s ideas in a bid to make good sense of social and intellectual conditions in Africa particularly as it relates to the scale and speed of social change that is needed in most African nations that are often ridden by corruption The book is suitable for studies in political philosophy economic and development studies African Studies and Indigenous Knowledge systems

Chlupatý, 2016-06-14 The sharing economy's unique customer to company exchange is possible because of the way in which money has evolved These transactions have not always been as fluid as they are today and they are likely to become even more fluid It is therefore critical that we learn to appreciate money's elastic nature as deeply as do Uber Airbnb Kickstarter and other innovators and that we understand money's transition from hard currencies to cryptocurrencies like Bitcoin if we are to access their cooperative potential The Evolution of Money illuminates this fascinating reality focusing on the tension between currency's real and abstract properties and advancing a vital theory of money rooted in this dual exchange It begins with the debt tablets of Mesopotamia and follows with the development of coin money in ancient Greece and Rome gold backed currencies in medieval Europe and monetary economics in Victorian England The book ends in the digital era with the cryptocurrencies and service providers that are making the most of money's virtual side and that suggest a tectonic shift in what we call money By building this organic time line The Evolution of Money helps us anticipate money's next transformative role **The Uncertain Future of Afghanistan** Nian Peng, Khalid Rahman, 2024-06-13 This edited book aims

Roberts, Charles J. Elfer, 2021-01-01 The challenges of teaching history are acute where we consider the world history classroom Generalized world history courses are a part of many if not most K 12 curricular frameworks in the United States While United States history tends to dominate the scholarship and conversation there are an equally wide number of middle level and secondary students and teachers engaged in the study of world history in our public schools And the challenges are

real In the first place if we are to mark content coverage as a curricular obstacle in the history classroom generally then we must underscore that concern in the world history classroom and for obvious reasons The curricular terrain to choose from is immense and forever expanding dealing with the development of numerous civilizations over millennia and across a wide geographic expanse In addition to curricular concerns world historical topics are inherently farther away from most students lives not just temporally but often geographically and culturally Thus the rationale for the present text Hollywood or History An Inquiry Based Strategy for Using Film to Teach World History The reviews of the first volume Hollywood or History An Inquiry Based Strategy for Using Film to Teach United States History strategy have been overwhelmingly positive especially as it pertains to the application of the strategy for practitioner Classroom utility and teacher practice have remained our primary objectives in developing the Hollywood or History strategy and we are encouraged by the possibilities of Volume II and the capacity of this most recent text to impact teaching and learning in world history We believe that students connection to film along with teachers ability to use film in an effective manner will help alleviate some of the challenges of teaching world history The book provides 30 secondary lesson plans grades 6 12 that address nine eras in world history
