Global Investment Competitiveness Report 2017/2018 World Bank Group, 2017-10-25 The Global Investment Competitiveness report presents new insights and evidence on drivers of foreign direct investment FDI in developing countries and FDI's role in development. The report's survey of 750 executives of multinational corporations finds that a business friendly legal and regulatory environment is a key driver of investment decisions in developing countries along with political stability, security and macroeconomic conditions. The report's topic specific chapters explore the potential of FDI to create new growth opportunities for local firms, assess the power of tax holidays and other fiscal incentives to attract FDI, analyze characteristics of FDI originating in developing countries and examine the experience of foreign investors in countries affected by conflict and fragility. Three key features of this Global Investment Competitiveness report distinguish it from other publications on FDI. First its insights are based on a combination of first hand perspectives of investors, extensive analysis of available data and evidence and international good practices in investment policy design and implementation. Secondly rather than exploring broad FDI trends the report provides detailed and unique analysis of FDI depending on its motivation, sector, geographic origin and destination and phase of investment. Thirdly the report offers practical and actionable recommendations to policymakers in developing countries wishing to reform their business climates for increased investment competitiveness. As such the report is meant to complement other knowledge products of the World Bank Group focused even more explicitly on country level data, detailed reform diagnostics and presentation of best practices. We are confident this report will bring value and fresh perspectives to a variety of audiences. To governments and policymakers including investment promotion professionals the report offers direct insights into the role of government policies and actions in investors decision making. To foreign investors and site location consultants the report provides information on FDI trends and drivers across sectors and geographies. For academic audiences the new datasets on investment incentives and FDI motivations enables opportunities for additional research and analysis. Lastly for development assistance providers and other stakeholders the report highlights key approaches for maximizing FDI's benefits for development.

From Corporate Social Responsibility to Corporate Social Liability Anna Aseeva, 2021-05-20 This book provides a critical socio legal study that brings together the latest scholarly advances on corporate social responsibility and at the same time addresses the pressing issue of corporate liability for harmful acts across the supply and production chains Corporations have seldom been held responsible and virtually never liable for the acts of their subsidiaries and subcontractors Actors as different as workers investors individual consumers and shareholder activists claim that corporations should accept greater responsibility for communities and environments affected by their activities The book argues that a global value chain s head corporations remain immune to any liability because of the economically dependent legally independent relationships between core corporations and their periphery suppliers and subcontractors To tackle this problem globally the author acknowledges that we as a society need to reduce the economic dependence as described above which is far too excessive by ensuring a level playing field both economically and socially More concretely she argues that in order to realise transnational corporate liability we as lawyers need to find a way or ways to establish legally effective relationships between head corporations and their economically dependent entities Readers of this book will be able to export the concept of corporate social liability developed in the context of value chains and apply it to other contexts involving corporate activities where they need to tackle unrestrained corporate freedom and make global businesses responsible and socially useful

Europäischen Union soll die große Freihandelszone der Welt geschaffen werden. Beifürworter versprechen sich Wirtschaftswachstum und die Schaffung von Arbeitsplätzen. Gegner kritisieren neben geringeren Hygiene- und Umweltstandards vor allem die Investitionsschutzbestimmungen. Im Rahmen derselben wird ausländischen Unternehmen die Möglichkeit eingeräumt, Staaten vor Schiedsgerichten zu verklagen. Kritiker und Befürworter besorgen sich über die Errichtung von angeblichen Geheimgerichten und bevorstehende Klagewellen ausländischer Investoren. Durch das Aussprechen von Schadensersatzsummen in Milliardenhöhe auf Grund von politischen Maßnahmen werden schließlich verheerende Folgen für den Rechtsstaat befürchtet. Als warnendes Beispiel dient der aktuelle Fall des Energiekonzerns Vattenfall. Dieser ist auf Grundlage des Energiecharta Abkommens vor ein Schiedsgericht gezogen, da die Bundesrepublik Deutschland durch den Atomausstieg deren Gewinnerwartung geschränkt hatte und verlangt nun 4,7 Mrd. Euro Schadensersatz. Der Arbeit konzentriert sich auf die wesentlichen juristischen Fragestellungen im Zusammenhang mit einer Investitionsschiedsgerichtsbarkeit im Rahmen des TTIP. Es wird die Entwicklung der Schiedsgerichtsbarkeit nachgezeichnet und auf die Frage eingegangen, ob im Rahmen von TTIP überhaupt eine schiedsgerichtliche Streitbeilegung zwischen einem Investor und einem Staat ein sogenanntes Investor State Settlement Dispute ISDS stattfindet. Nachfolgend wird die Praxis und Besonderheiten der Schiedsgerichte im ISDS untersucht sowie spezielle Probleme im Zusammenhang mit dem Europa- und Verfassungsrecht. Abschließend bezieht der Autor eine Stellung und nennt mögliche Perspektiven.

The Political Economy of Climate Finance Effectiveness in Developing Countries Mark Purdon, 2024-01-01

There is ample evidence that engaging developing countries on climate change mitigation would have significant positive impacts on global climate efforts. There is much debate however on the most effective strategy for unlocking these low cost mitigation opportunities. While the Clean Development Mechanism (CDM) emerged as the main climate finance instrument for engaging developing countries under the Kyoto Protocol, the carbon market approach it embodied would largely be replaced by a new array of climate finance instruments based on climate funds. In *The Political Economy of Climate Finance Effectiveness in Developing Countries*, Mark Purdon shows that the effectiveness of climate finance instruments to reduce emissions under either strategy has depended on the interaction between prevailing ideas about how to develop a nation's economy as well as state interests in various economic sectors. Based on multiple field visits over a decade in three countries, the author demonstrates that climate finance instruments have been more effectively implemented when the state treats them as vehicles for addressing priority development issues. Climate finance instruments were more consistently and effectively implemented in Uganda and Moldova than Tanzania despite differences in state capacity between countries. This pattern held for the CDM as well as subsequent instruments largely based on climate funds such as Reducing Emissions from Deforestation and Forest Degradation (REDD) and other national mitigation actions. Contributing to broader debates on international climate cooperation, Purdon's findings inform international efforts to support national climate plans and catalyze low carbon development by emphasizing the
