of prominent English God debaters Richard Dawkins Karen Armstrong Christopher Hitchens and Terry Eagleton Adrian Rosenfeldt demonstrates that New Atheist and religious apologist ideas and arguments about God science and identity are driven by mythic autobiographical narratives and Protestant or Catholic cultural heritage This study is informed by criticism of the New Atheist polemic as being positivistic and the religious apologists as propagating sophisticated theology In both cases the God debaters are perceived as disassociating themselves from human lived experience It is through reconnecting the God debaters intellectual ideas to their cultural and social background that the God debate can be grounded in a recognisable human reality that eludes reductive distinctions and disembodied abstractions *Simon Magus: The First Gnostic?* Stephen Haar,2012-10-24 This latest comprehensive work on Simon Magus lends new impetus to the investigation of Early Christianity and questions surrounding the origin and nature of Gnosticism Major contributions of this study include 1 a departure from the traditional exegesis of Acts 8 5 24 the first narrative source of Simon and the later following reports of ancient Christian writers 2 an overview of the literature of Graeco Roman antiquity to determine the contribution of magic and the Magoi in the development of perceptions and descriptions of Simon and 3 the inclusion of social science explanation models and modern estimations of identity in a creative approach to questions surrounding the phenomenon of Simon

**Resurrection Initiation** Midas Mantra,2011-09-01 Is there life after death What are the pyramids for What is The Process and the Joy mans destiny on Earth In 2001 I died and became the god of resurrection In this divine state I promised to teach of the process and of the joy before returning to my body finding myself in a world of strange auras and weird synchronicity My hedonistic life of travel crumbled as I struggled to cope with the enormity of this experience and my new found view of the world Just as I was finding my feet I died again and travelled to the Godhead Through meditation I experienced the breathless state of Samadhi and travelled the corridors of the cosmic temple of the wheel of time Through books I found confirmation as to the nature of the resurrection initiation and its use by ancient shaman Egyptian Mayan and Indian kings as well as by Jesus and Plato This book is an attempt to fulfil my souls promise and unveil the great mystery

Anthropology and Cryptozoology Samantha Hurn,2016-11-03 Cryptozoology is best understood as the study of animals which in the eyes of Western science are extinct unclassified or unrecognised In consequence and in part because of its selective methods and lack of epistemological rigour cryptozoology is often dismissed as a pseudo science However there is a growing recognition that social science can benefit from engaging with it for as social scientists are very well aware scientific categorisation and explanation represents just one of a myriad of systems used by humans to enable them to classify and make sense of the world around them In many cultural contexts myth folk classification and lived experience challenge the truth expounded by scientists With a reflexive anthropological approach and drawing on rich empirical and ethnographic studies from around the world this volume engages with the theoretical and methodological issues raised by reported sightings of unrecognised animals Bringing into sharp focus the anthropological value and challenges for

methodology posed by beliefs about unclassified creatures Anthropology and Cryptozoology Exploring encounters with mysterious creatures will be of interest to anthropologists sociologists and geographers working in the fields of research methods anthrozoology mythology and folklore and human animal interaction

**PROGRESSION OF KNOWLEDGE IN WESTERN CIVILIZATION** Mirza Iqbal Ashraf, 2023-09-18 The word civilization which is a relatively recent application from eighteenth century when came into currency is generally invoked more with a rhetorical flourish than argued in philosophical perspective But history of knowledge considers its true object is the study of human mind to know what his mind has believed thought and felt in diverse periods of its progression in the history of a civilization Mirza Iqbal Ashraf as a research scholar of Islamic and Western philosophies identifying the Four Explosions of Knowledge from ancient to modern time of history of knowledge offers the readers in Progression of Knowledge in the Western Civilization uniquely within philosophical perspective that the Western world is a civilization of knowledge This also means whereas it is important to understand today's world so that we can deal with our contemporary period's civilizational challenges it will be incomplete if we do not assess that modernity is born from the progress made by the knowledge of the past thinkers But knowledge does not arrive fully formed it requires many minds specifically those minds which are free from the civilization's religious cultural and geophysical trappings In the Progression of Knowledge in Western Civilization Ashraf has expounded that even in modern time no knowledge is complete without visiting the knowledge of the past especially of the great thinkers of Classical Greek period the scholars at the House of Wisdom in Baghdad and the famous centers of knowledge at Cairo and Cordova of Arab Spain In this book the author has discussed when some other regions of the world might be familiar with philosophy and science in one way or another why such a treasure of knowledge emerged particularly in Greece that became a foundation of voluminous work of literature in almost every field of knowledge and how it amazingly became the foundation of the history of progression of knowledge in the Western civilization which is timelessly flourishing until today
