how Germany's most notorious human rights abuses began with violating the human rights of children with disabilities like autism. Evidence suggests that Germany's Christians unwittingly contributed to their catastrophic outcomes by remaining silent when speaking out might have made a difference. Today we see a growing trend of abuse against vulnerable people in the USA and like Germany's Christians we are not speaking out. It seems that without intelligent Christian opposition the creep toward genocide in the USA has begun. We are now seeing the first indications of a genocidal tyranny which infected Germany now appearing in the USA. It could soon grow up to overshadow the world's memory of Nazi Germany but there is hope. This book offers biblically sound research based evidence which intelligently refutes popular anti-biblical views on history, philosophy and science. It also offers new possibilities for the discovery and defeat of prejudicial attitudes that have divided human populations for centuries. In these pages the reader will find renewed confidence in the reliability of the scriptures while discovering the Bible's relevance to topics like genetics and DNA, the origins of human life and the seat of human rights. Finally the reader will understand why these Christian perspectives matter to all people everywhere regardless of their personal religious inclinations.
