Emerging Global Population Health Risks: From Epidemiological Perspectives Russell Kabir ,Ali Davod Parsa,Ilias Mahmud, 2024-08-22 Public and global health professionals realize that despite significant advances in improving population health and preventing high mortality from communicable and non communicable diseases and managing treating both communicable and con communicable diseases the global population health status remains fragile This is partly due to the global life pattern in the 21st century making world as a global village Individuals movements in global society have been facilitated rapidly and the current advance in travel and trade across different geographical locations allow rapid spread of any newly identified infectious agents Therefore relatively the likelihood of an outbreak and pandemic increases if there is no suitably coordinated active global surveillance in place
