

The background of the image is a dark, futuristic space with a grid of glowing white lines that recede into the distance, creating a sense of depth. Scattered throughout the dark space are numerous small, bright white dots, resembling stars or distant galaxies. Two horizontal white lines intersect the grid, one above and one below the central text.

Zeus++ David F. Robinson,1999 A User s Manual for the Zeus Flowfield Analysis tool is provided along with a tutorial for setting up and executing a missile geometry with control surfaces The tool solves the three dimensional Euler equations to calculate the inviscid flowfield about the geometry This inviscid solution is then supplied as input to an integral boundary layer solver which calculates the effects of viscosity on the body Finally if a more in depth solution is desired Zeus can be used to generate a computational domain for use in a full Navier Stokes solver By applying the Zeus tool computational analyses of complex three dimensional missile geometries can be performed on a personal computer in a matter of minutes In addition a computational grid suitable for a full Navier Stokes solver can be generated in approximately 10 min This represents significant savings in both manpower and computational costs typically associated with computational fluid dynamics

to understanding Pindar's poetry for those coming to the works for the first time. His is the largest body of textual remains that exists for ancient Greece between Homer conventionally dated to 750 BCE and the Classical Period 480-323 BCE and constitutes a rich resource for politics, history, religion, and social practices. **The Pindaric Mind** Thomas K.

Hubbard, 1985-01-01 In contrast with previous methodologies which seek key ideas or functional programs, this book argues that the unique complexity of Pindar's choral lyric can be better understood by analysis of each text's logical configuration as a network of interacting polarities and analogies. Against the backdrop of pre-Socratic philosophy and later rhetorical tradition, the book systematically examines the primary polar relations which are prominent in Pindar's work, illustrating their development and transformation through the course of individual odes. The author concludes that Pindar expands traditional ethical dichotomies into dynamic tensions which play on the semantic fluidity of Greek poetic language in its formative period. This work attempts to apply structuralist hermeneutics in an appropriate way to the elucidation of an often difficult and obscure archaic poet. Accordingly, it should be of interest not only to the Pindaric specialist but also to students of literary theory and the history of ideas in antiquity. **The Pindaric Mind** Thomas K.
