Zeus++ David F. Robinson,1999 A User s Manual for the Zeus Flowfield Analysis tool is provided along with a tutorial for setting up and executing a missile geometry with control surfaces The tool solves the three dimensional Euler equations to calculate the inviscid flowfield about the geometry This inviscid solution is then supplied as input to an integral boundary layer solver which calculates the effects of viscosity on the body Finally if a more in depth solution is desired Zeus can be used to generate a computational domain for use in a full Navier Stokes solver By applying the Zeus tool computational analyses of complex three dimensional missile geometries can be performed on a personal computer in a matter of minutes In addition a computational grid suitable for a full Navier Stokes solver can be generated in approximately 10 min This represents significant savings in both manpower and computational costs typically associated with computational fluid dynamics

Kingdom? John Mohan,2014-04-23 The human geography of the UK is currently being reshaped by a number of forces such as globalisation transition in the organisations of production the changing character of state intervention and changing relationships with Europe A consideration of the impacts of these forces on economic social and political landscapes is therefore an urgent task At the same time enduring institutional features of the British economy and polity are also having important influences on socio economic processes The result is a complex mosaic of uneven development which belies the notion of simplistic regional contrasts Rather than simply mapping spatial inequality A United Kingdom charts the processes underpinning uneven development at a range of scales and for a number of key topics The book draws upon and synthesises the latest contemporary research findings and places emphasis on the interrelated nature of economic social and political

geographies It treats the human geographies of the UK in a coherent and integrated way and asks whether contemporary processes of change are tending towards the reduction of socio spatial divisions or their reproduction in new forms 200
