Modeling and Optimal Control of Heavy-Duty Powertrains Vaheed Nezhadali, 2016-05-30 Heavy duty powertrains are complex systems with components from various domains different response times during transient operations and different efficient operating ranges To ensure efficient transient operation of a powertrain e.g. with low fuel consumption or short transient duration it is important to come up with proper control strategies In this dissertation optimal control theory is used to calculate and analyze efficient heavy duty powertrain controls during transient operations in different applications This is enabled by first developing control ready models usable for multi phase optimal control problem formulations and then using numerical optimal control methods to calculate the optimal transients Optimal control analysis of a wheel loader operating in a repetitive loading cycle is the first studied application Increasing fuel efficiency or reducing the operation time in such repetitive loading cycles sums up to large savings over longer periods of time Load lifting and vehicle traction consume almost all of the power produced by a diesel engine during wheel loader operation Physical models are developed for these subsystems where the dynamics are described by differential equations The model parameters are tuned and fuel consumption estimation is validated against measured values from real wheel loader operation The sensitivity of wheel loader trajectory with respect to constraints such as the angle at which the wheel loader reaches the unloading position is also analyzed A time and fuel optimal trajectory map is calculated for various unloading positions Moreover the importance of simultaneous optimization of wheel loader trajectory and the component transients is shown via a side to side comparison between measured fuel consumption and trajectories versus optimal control results In another application optimal control is used to calculate efficient gear shift controls for a heavy duty Automatic Transmission system A modeling and optimal control framework is developed for a nine speed automatic transmission Solving optimal control problems using the developed model time and jerk efficient transient for simultaneous disengagement of off going and engagement of in coming shift actuators are obtained and the results are analyzed Optimal controls of a diesel electric powertrain during a gear shift in an Automated Manual Transmission system are calculated and analyzed in another application of optimal control The powertrain model is extended by including driveline backlash angle as an extra state in the system This is enabled by implementation of smoothing techniques in order to describe backlash dynamics as a single continuous function during all gear shift phases Optimal controls are also calculated for a diesel electric powertrain corresponding to a hybrid bus during a tip in maneuver It is shown that for optimal control analysis of complex powertrain systems minimizing only one property such as time pushes the system transients into extreme operating conditions far from what is achievable in real applications Multi objective optimal control problem formulations are

suggested in order to obtain a compromise between various objectives when analyzing such complex powertrain systems

The Handbook of Lithium-Ion Battery Pack Design John T. Warner, 2024-05-14 The Handbook of Lithium Ion Battery Pack Design Chemistry Components Types and Terminology Second Edition provides a clear and concise explanation of EV and Li ion batteries for readers that are new to the field The second edition expands and updates all topics covered in the original book adding more details to all existing chapters and including major updates to align with all of the rapid changes the industry has experienced over the past few years This handbook offers a layman s explanation of the history of vehicle electrification and battery technology describing the various terminology and acronyms and explaining how to do simple calculations that can be used in determining basic battery sizing capacity voltage and energy By the end of this book the reader will have a solid understanding of the terminology around Li ion batteries and be able to undertake simple battery calculations The book is immensely useful to beginning and experienced engineers alike who are moving into the battery field Li ion batteries are one of the most unique systems in automobiles today in that they combine multiple engineering disciplines yet most engineering programs focus on only a single engineering field This book provides the reader with a reference to the history terminology and design criteria needed to understand the Li ion battery and to successfully lay out a new battery concept Whether you are an electrical engineer a mechanical engineer or a chemist this book will help you better appreciate the inter relationships between the various battery engineering fields that are required to understand the battery as an Energy Storage System It gives great insights for readers ranging from engineers to sales marketing management leadership investors and government officials Adds a brief history of battery technology and its evolution to current technologies Expands and updates the chemistry to include the latest types Discusses thermal runaway and cascading failure mitigation technologies Expands and updates the descriptions of the battery module and pack components and systems Adds description of the manufacturing processes for cells modules and packs Introduces and discusses new topics such as battery as a service cell to pack and cell to chassis designs and wireless BMS

Solid Waste Engineering and Management Lawrence K. Wang, Mu-Hao Sung Wang, Yung-Tse Hung, 2022-01-01 This book is the first volume in a three volume set on Solid Waste Engineering and Management It provides an introduction to the topic and focuses on legislation transportation transfer station characterization mechanical volume reduction measurement combustion incineration composting landfilling and systems planning as it pertains to solid waste management The three volumes comprehensively discuss various contemporary issues associated with solid waste pollution management impacts on the environment and vulnerable human populations and solutions to these problems

Building Wealth in China , 2010-04-27 See how thirty six of China s most successful and innovative entrepreneurs are creating the global economy of tomorrow In these pages you ll learn valuable lessons from remarkable business leaders such as Zhang Yin chairwoman of Nine Dragons Paper Holdings Limited who trans formed wastepaper into a personal fortune estimated at 3 4 billion Lu Guanqiu who turned a small farm

machinery workshop into China's largest auto parts manufacturer with sales of 7 billion. Yan Zhaoqiang, who saw opportunity in the global energy crisis and positioned his company TCP to become one of the world's major manufacturers of energy efficient lightbulbs with control of 70 percent of the U.S. market. Song Zhenghuan, a former math teacher who founded a company that is now the largest supplier of baby strollers in China. Their stories offer inspiration to the entrepreneurs of tomorrow and capture the spirit of innovation and diligence that is the hallmark of the emerging economy of China today.

State of Colorado Mobile Equipment Manual, 2019 **Hybrid Electric Vehicles** Teresa Donateo, 2017-06-21 This book on hybrid electric vehicles brings out six chapters on some of the research activities through the wide range of current issues on hybrid electric vehicles. The first section deals with two interesting applications of HEVs, namely urban buses and heavy duty working machines. The second one groups papers related to the optimization of the electricity flows in a hybrid electric vehicle, starting from the optimization of recharge in PHEVs through advanced storage systems, new motor technologies and integrated starter alternator technologies. A comprehensive analysis of the technologies used in HEVs is beyond the aim of the book. However, the content of this volume can be useful to scientists and students to broaden their knowledge of technologies and application of hybrid electric vehicles.

Proceedings of the 2013 International Conference on Advances in Construction Machinery and Vehicle Engineering Zheng Huiqiang, Shi Laide, 2013-11-01

the 10th anniversary of Chinese Journal of Construction Machinery. In order to celebrate the 20th anniversary of the association and the 10th anniversary of the journal, we will hold the following activities this year:

1. Continue to convene the fourth International Conference Symposium of 2013 on Construction Machinery and Vehicle Engineering Research Progress.
2. Continue to convene the fifth National Mechanical Engineering Doctoral Forum. This forum will be held in Xuzhou and the time is from August 20 to August 24 in 2013.
3. The high-level expert forum will be held during Changsha Engineering Machinery Parts Expo. A dialogue will be taken on the issues of industry scientific innovation, accessories testing and quality among universities, research institutes and enterprises.
4. The celebrations about the 20th anniversary of the association and the 10th anniversary of the journal will be conducted in Shanghai.

The council of the new editorial board and the executive director is convened for summing up the work of the association since it was founded 20 years ago and the work of the journal since it was founded 10 years ago and planning for the future development. This International Conference is held in the circumstance of international economic crisis and domestic industrial structure adjustment. In the past year, sales market of construction machinery has been subjected to a certain shock and the enterprises have encountered a certain difficulties. For the future, however, I believe that such difficulties are temporary and the prospect is bright. The construction machinery is to serve the mining and state infrastructure construction and for China along with most countries in the world which are developing countries, the infrastructure construction is still a significant part in the course of development and the sound infrastructure will promote the development of their economies even these countries which are in the leading position in

economy development also attach great importance to the improvement of infrastructure Therefore construction machinery is indispensable and has a rigid demand Currently the international competition has not been only limited to terrestrial since the possession of terrestrial was a foregone conclusion but there will be more

Advances in Energy Science and Equipment Engineering II Volume 1 Shiquan Zhou, Aragona Patty, Shiming Chen, 2017-09-19 The 2016 2nd International Conference on Energy Equipment Science and Engineering ICEESE 2016 will be held on November 12 14 2016 in Guangzhou China ICEESE 2016 is to bring together innovative academics and industrial experts in the field of energy equipment science and engineering to a common forum The primary goal of the conference is to promote research and developmental activities in energy equipment science and engineering and another goal is to promote scientific information interchange between researchers developers engineers students and practitioners working all around the world The conference will be held every year to make it an ideal platform for people to share views and experiences in energy equipment science and engineering and related areas

Strategic Management John A. Parnell, 2013-01-15 Balancing theory with practice this fully updated fourth edition of John A Parnell's acclaimed text continues to provide detailed accessible coverage of the strategic management field Taking a global perspective the text addresses concepts sequentially from external and internal analysis to strategy formulation strategy execution and strategic control To help readers build their analytic skills as they master course concepts Parnell aligns each chapter's key concepts with 25 case analysis steps Current examples and high interest cases largely drawn from The Wall Street Journal and Financial Times illustrate the key role of strategic management in the United States and around the world Ideal for the capstone strategic management course Strategic Management is appropriate for a range of undergraduate and graduate courses
