*Cultivating Moral Character and Virtue in Professional Practice* David Carr, 2018-03-05 Cultivating Moral Character and Virtue in Professional Practice is a pioneering collection of essays focused on the place of character and virtue in professional practice Professional practices usually have codes of conduct designed to ensure good

conduct but while such codes may be necessary and useful they appear far from sufficient since many recent public scandals in professional life seem to have been attributable to failures of personal moral character This book argues that there is a pressing need to devote more attention in professional education to the cultivation or development of such moral qualities as integrity courage self control service and selflessness Featuring contributions from distinguished leaders in the application of virtue ethics to professional practice such as Sarah Banks Ann Gallagher Geoffrey Moore Justin Oakley and Nancy Sherman the volume looks beyond traditional professions to explore the ethical dimensions of a broad range of important professional practices Inspired by a successful international and interdisciplinary conference on the topic the book examines various ways of promoting moral character and virtue in professional life from the general ethical perspective of contemporary neo Aristotelian virtue theory The professional concerns of this work are of global significance and the book will be valuable reading for all working in contemporary professional practices It will be of particular interest to academics practitioners and postgraduate students in the fields of education medicine nursing social work business and commerce and military service

**Cognitive Contributions to Well-Being** Michael D. Robinson,Michael Eid,2017-06-28 This edited volume focuses on different views of happiness and well being considering constructs like meaning and spirituality in addition to the more standard constructs of positive emotion and life satisfaction A premise of the volume is that being happy consists of more than having the right things happen to us it also depends on how we interpret those events as well as what we are trying to achieve Such considerations suggest that cognitive emotional factors should play a fairly pronounced role in how happy we are The present volume pursues these themes in the context of 25 chapters organized into 5 sections The first section centers on cognitive variables such as attention and executive function in addition to mindfulness The second section considers important sources of positive cognition such as savoring and optimism and the third section focuses on self regulatory contributions to well being Finally social processes are covered in a fourth section and meaning related processes are covered in the fifth What results is a rich and diverse volume centering on the ways in which our minds can help or hinder our aspirations for happiness **Flow.
