- 1 Forget your ego Never write with the objective of impressing someone even if that someone is you Sometimes we write and then re read what we have written a few times then we give ourselves a mental round of applause before sending it The problem is our priority wasn't communication in this scenario it was to feed our ego Trying to impress people with long over complicated sentences and words has the opposite effect Always keep clear communication and context in mind in every exchange
- 2 Aim to explain difficult concepts or problems in a simple easy to understand way This shows intelligence because it means you have digested the concepts and are skilful enough to explain them When you make concepts sound more complicated than they are it gives people the impression that you don't understand because you probably don't
- 3 If it's not relevant to the situation or the decision being made don't mention it it will clutter your communication and could cause confusion
- 4 When you need to write important or sensitive emails stick to the facts Your emotions or opinions are not important or relevant in most cases
