Writing Effective User Stories As A User I Can Express A Business Need In User Story Format To Get The It Solution I Need:

Writing Effective User Stories Thomas and Angela Hathaway, 2013-07-29

WHAT IS THIS BOOK ABOUT This Book Is About the Card User Story Card Criteria Conversation User Stories are a great method for expressing stakeholder requirements whether your projects follow an Agile Iterative or a Waterfall methodology They are the basis for developers to deliver a suitable information technology IT app or application Well structured user stories express a single action to achieve a specific goal from the perspective of a single role When writing user stories stakeholders knowledgeable about the role should focus on the business result that the IT solution will enable while leaving technology decisions up to the developers Good user stories are relevant to the project unambiguous and understandable to knowledge peers The best user stories also contain crucial non functional quality requirements which are the best weapon in the war against unsatisfactory performance in IT solutions This book presents two common user story structures to help you ensure that your user stories have all the required components and that they express the true business need as succinctly as possible It offers five simple rules to ensure that your user stories are the best that they can be That in turn will reduce the amount of time needed in user story elaboration and discussion with the development team This book targets business professionals who are involved with an IT project Product Owners in charge of managing a backlog or Business Analysts working with an Agile team

Author's Note The term User Story is a relative new addition to our language and its definition is evolving In today's parlance a complete User Story has three primary components namely the Card the Conversation and the Criteria Different roles are responsible for creating each component The Card expresses a business need A representative of the business community is responsible for expressing the business need Historically and for practical reasons the Card is the User Story from the perspective of the business community Since we wrote this book specifically to address that audience we use the term User Story in that context throughout The Conversation is an ongoing discussion between a developer responsible for creating software that meets the business need and the domain expert(s) who defined it e.g. the original author of the Card The developer initiates the Conversation with the domain expert(s) to define the Criteria and any additional information the developer needs to create the application There is much to be written about both the Conversation and the Criteria but neither component is dealt with in any detail in this publication A well written User Story Card can drastically reduce the time needed for the Conversation It reduces misinterpretations misunderstandings and false starts thereby paving the way for faster delivery of working software We chose to limit the content of this publication to the User Story as understood by the business community to keep the book focused and address the widest possible audience

WHO WILL BENEFIT FROM READING THIS BOOK How organizations develop and deliver working software has changed significantly in recent years Because the change was greatest in the developer community many books and courses justifiably target that group There is however an overlooked group of people

essential to the development of software as an asset that have been neglected Many distinct roles or job titles in the business community perform business needs analysis for digital solutions They include Product Owners Business Analysts Requirements Engineers Test Developers Business and Customer side Team Members Agile Team Members Subject Matter Experts SME Project Leaders and Managers Systems Analysts and Designers AND anyone wearing the business analysis hat meaning anyone responsible for defining a future IT solution TOM AND ANGELA S the authors STORY Like all good IT stories theirs started on a project many years ago Tom was the super techie Angela the super SME They fought their way through the 3 year development of a new policy maintenance system for an insurance company They vehemently disagreed on many aspects but in the process discovered a fundamental truth about IT projects The business community Angela should decide on the business needs while the technical team s Tom s job was to make the technology deliver what the business needed Talk about a revolutionary idea All that was left was learning how to communicate with each other without bloodshed to make the project a resounding success Mission accomplished They decided this epiphany was so important that the world needed to know about it As a result they made it their mission and their passion to share this ground breaking concept with the rest of the world To achieve that lofty goal they married and began the mission that still defines their life After over 30 years of living and working together 24x7x365 they are still wildly enthusiastic about helping the victims of technology learn how to ask for and get the digital IT solutions they need to do their jobs better More importantly they are more enthusiastically in love with each other than ever before
