You are Not a Gadget Jaron Lanier, 2010 A computer age visionary argues that the Internet has failed to live up to its early promises sharing cautionary perspectives on the Web 2.0 design concept while optimistically evaluating the Internet as a positive cultural vehicle Das halbwegs Soziale Geert Lovink, 2014-03-15 Während die meisten Facebook User noch mit Freund Werden Liken und Kommentieren beschäftigt sind ist es an der Zeit auch die Konsequenzen unserer informationsbesserten Lebensweise zu betrachten Warum machen wir so fleißig bei den sozialen Netzwerken mit Und wie hängt unsere Fixierung auf Identität und Selbstmanagement mit der Fragmentierung und Datenflut in der Online Kultur zusammen Mit seinen Studien zu Suchmaschinen Online Videos Blogging digitalem Radio Medienaktivismus und WikiLeaks dringt Lovink in neue Theoriefelder vor und formuliert eine klare Botschaft Wir müssen unsere kritischen Fähigkeiten nutzen und auf das technologische Design und Arbeitsfeld Einfluss nehmen sonst werden wir in der digitalen Wolke verschwinden

Mediaphilism Ryan Somma, 2012-05 Collected here are the best of 10 years worth of essays from ideonexus.com reviewing films books games and culture from the perspective of a nerd in love with science and wonder Digital Disconnect Robert W. McChesney, 2013-03-05 Celebrants and skeptics alike have produced valuable analyses of the Internet's effect on us and our world oscillating between utopian bliss and dystopian hell But according to Robert W McChesney arguments on both sides fail to address the relationship between economic power and the digital world McChesney's award winning Rich Media Poor Democracy skewered the assumption that a society drenched in commercial information is a democratic one In Digital Disconnect McChesney returns to this provocative thesis in light of the advances of the digital age incorporating capitalism into the heart of his analysis He argues that the sharp decline in the enforcement of antitrust violations the increase in patents on digital technology and proprietary systems and other policies and massive indirect subsidies have made the Internet a place of numbing commercialism A small handful of monopolies now dominate the political economy from Google which garners an astonishing 97 percent share of the mobile search market to Microsoft whose operating system is used by over 90 percent of the world's computers This capitalistic colonization of the Internet has spurred the collapse of credible journalism and made the Internet an unparalleled apparatus for government and corporate surveillance and a disturbingly anti democratic force In Digital Disconnect Robert McChesney offers a groundbreaking analysis and critique of the Internet urging us to reclaim the democratizing potential of the digital revolution while we still can *Brand Vandals* Steve Earl, Stephen Waddington, 2013-10-31 Thanks to the rise of social media what audiences think and say about organisations has never been more critical Steve Earl and Stephen Waddington's Brand Anarchy examined the impact of media change and the new reputation landscape brought about by disaffected shareholders customers and staff voicing their opinions to a global Internet audience The authors continue the story here with the brand vandals going one step further mobilising themselves and the Internet to wage war on organisations and willfully cause lasting reputational

damage For the organization engagement isn't an option it's a necessity Brand vandals are forcing a level of dialogue that organisations public and private have never had to contemplate before Smart organisations are helping to define the future of modern brand communication by retooling their public relations and communications teams to truly get to grips with the challenge of engaging audiences in a 24/7 conversation that not only answers criticism but positively rebuilds corporate reputation Is your organisation ready for the brand vandals *Cyberspace and Politics* Brent Craige, BS Political Science, 2021-06-16 *Cyberspace and Politics* is a collection of essays written in 2012 centered around the rise of electronic cultural policy Dr Darryl Roberts 1953-2016 the professor who created *Cyberspace and Politics* masterfully crafted his course for the purpose of preparing future generations for the opportunities and threats of the digital age *Cyberspace* is still in its infancy stages and it has already managed to consume our lives on a global scale If we do not get a better understanding of the opportunities and threats of cyberspace soon it may be too late This book serves as an entry level tool for understanding cyberspace politics and how society is adjusting to them **The Hands-On Life** Amy E. Weldon, 2018-01-30 Stressed out Swimming in a sea of screens Worried about our beloved endangered earth yet uncertain how to work for change If this sounds familiar you're not alone In this intelligent guide to mindfulness in the digital age writer and teacher Amy Weldon describes how practicing life as an artist can help you wake yourself up and take back control of your attention your money your time and the health of our society and our planet Traveling from farm to protest march to classroom and engaging a range of thinkers from Hannah Arendt to George Orwell John Keats and Henry David Thoreau *The Hands On Life* is a book for students and for everyone who dreams of building a better world *The Silicon Valley Challenge* Christoph Keese, 2016-10-17 An Insider Report from the Centre of the Digital Universe Silicon Valley shook the European economy to its core American technology companies are the big winners of digitization With the capacity to reach billions of people they are aggressively making inroads into traditional industries Digital Disruption poses a major threat to European industries such as automotive retail logistics healthcare pharmaceuticals banks insurance companies and chemicals No sector is spared from the onslaught of Silicon Valley with dramatic consequences for workers in Europe Who is behind Silicon Valley's enormous success How do the founders and investors think Where does all the money come from Why are their universities so successful In short How does Silicon Valley function Christoph Keese a Berlin based author and top executive of Axel Springer the highly digitalized publishing house lived and worked in Silicon Valley for half a year on behalf of his company He wrote an account of his experiences in this book It is a gripping narrative written from the epicenter of the 21st Century vivid memorable and well informed His book has become a bestseller in Germany It is now available in English for the first time **Geschichte digital** Guido Koller, 2016-04-20 Nowadays digital communication decisively shapes the professional image of the historian What was still the exception 20 years ago is the norm today Historical worlds are measured digitally and interpreted analogically Digitalisation is changing the way historians think teach and write even today and is having a

retroactive effect on the writing of history Today historians process large amounts of data with algorithms which make completely new perspectives and approaches to historical sources possible The book describes the state of digital transformation for history as part of the humanities and discussed the perspectives on the future of the big data in the historical sciences A service part complements this book in which infrastructure portals tools standards and blogs are presented

**Sociophobia** César Rendueles, 2017-04-11 The great ideological cliché of our time César Rendueles argues in *Sociophobia* is the idea that communication technologies can support positive social dynamics and improve economic and political conditions We would like to believe that the Internet has given us the tools to overcome modernity's practical dilemmas and bring us into closer relation but recent events show how technology has in fact driven us farther apart Named one of the ten best books of the year by *Babelia* El País *Sociophobia* looks at the root causes of neoliberal utopia's modern collapse It begins by questioning the cyber fetishist dogma that lulls us into thinking our passive relationship with technology plays a positive role in resolving longstanding differences Rendueles claims that the World Wide Web has produced a diminished rather than augmented social reality In other words it has lowered our expectations with respect to political interventions and personal relations In an effort to correct this trend Rendueles embarks on an ambitious reassessment of our antagonistic political traditions to prove that post capitalism is not only a feasible intimate and friendly system to strive for but also essential for moving past consumerism and political malaise

**Who Invented Oscar Wilde?** David Newhoff, 2020-11 AAP PROSE Award Finalist in Media and Culture Studies 2021 In early 1882 before young Oscar Wilde embarked on his lecture tour across America he posed for publicity photos taken by a famously eccentric New York photographer named Napoleon Sarony Few would guess that one of those photographs would become the subject of the Supreme Court case that challenged copyright protection for all photography a constitutional question that asked how a machine made image could possibly be a work of human creativity *Who Invented Oscar Wilde* is a story about the nature of authorship and the convenient fiction we call copyright While a seemingly obscure topic copyright has been a hotly contested issue almost since the day the internet became publicly accessible The presumed obsolescence of authorial rights in this age of abundant access has fueled a debate that reaches far beyond the question of compensation for authors of works Much of the literature on the subject is either highly academic highly critical of copyright or both With a light and balanced touch David Newhoff makes a case for intellectual property law tracing the concept of authorship from copyright's ancient beginnings to its adoption in American culture to its eventual confrontation with photography and its relevance in the digital age Newhoff tells a little known story that will appeal to a broad spectrum of interests while making an argument that copyright is an essential ingredient to upholding the principles on which liberal democracy is founded

*Think CROSS - Change MEDIA. Crossmedia im Jahr 2014 - Eine Standortbestimmung* Christine Goutrié, Sabine Falk-Bartz, Ilona Wuschig, 2014-07-29 Der Band Think CROSS Change MEDIA gibt resultierend aus Beiträgen auf der gleichnamigen Konferenz 2014 einen Überblick aus Wissenschaft und Praxis zu relevanten Themen wie Datenjournalismus, Open Data, Demokratie im Netz, Partizipation, Content und Design für Social Media, Connected Social TV, Internet der Dinge, Onlinekollaboration, Crossmedia Journalismus im Wandel sowie Crossmediales Storytelling. Seit der ersten Ausgabe von Think Cross Change MEDIA 2012 hat sich die Welt der Medien und ihrer tangierenden Bereiche weiter in Richtung Digitalisierung entwickelt. Online-Sparten sind keine Randerscheinung mehr, sondern in etlichen Häusern mindestens gleichrangige Abteilungen. Die Absatzzahlen auf dem Printmedienmarkt sind weiter gesunken, die Zahl der Online-Zugriffe in Informationsportalen steigt wie insgesamt die im Netz verbrachte Zeit der Deutschen. Wir beobachten weiterhin Versuche, Inhalte im Netz zu monetarisieren und einen Onlinejournalismus zu schaffen, der auch Broterwerb zulässt. Wir haben einem mutigen Amerikaner die Offenlegung der gr

Wir haben erlebt wie facebook immer weiter wächst und sich Innovationen der Konkurrenz durch Übernahme z.B. von WhatsApp zu eigen macht. Wir haben gesehen welche Rolle Open Data spielen kann und wie das Informationsfreiheitsgesetz zwar auf dem Papier existiert aber immer noch zu selten von Journalisten genutzt und von Teilen der Politik umgangen wird. Datenjournalismus gewann an Bedeutung durch neue Technologien der Datenrecherche und Visualisierung. Wird es leichter große Datensätze aufzubereiten und daraus journalistisch wertvolle Informationen zu ziehen die für sich Geschichten erzählen?

3D Printing Bibi van den Berg, Simone van der Hof, Eleni Kosta, 2015-12-24 The book in front of you is the first international academic volume on the legal, philosophical and economic aspects of the rise of 3D printing. In recent years 3D printing has become a hot topic. Some claim that it will revolutionize production and mass consumption enabling consumers to print anything from clothing, automobile parts and guns to various foods, medication and spare parts for their home appliances. This may significantly reduce our environmental footprint but also offers potential for innovation and creativity. At the same time 3D printing raises social, ethical, regulatory and legal questions. If individuals can print anything they want, how does this affect existing systems of intellectual property rights? What are the societal consequences of the various types of products one can print with a 3D printer, for example weapons? Should all aspects of 3D printing be regulated and if so how and to what ends? How will businesses have to change their way of working and their revenue model in light of the shift to printing on demand? How will the role of product designers change in a world where everyone has the potential to design their own products? These and other questions are addressed in high quality and in depth contributions by academics and experts bringing together a wide variety of academic discussions on 3D printing from different disciplines as well as presenting new views broadening the discussion beyond the merely technical dimension of 3D printing. Bibi van den Berg is Associate Professor at eLaw, the Center for Law and Digital Technologies at Leiden University, The Netherlands. Simone van der Hof is Full Professor at eLaw in Leiden and Eleni Kosta is Associate Professor at TILT, the Tilburg Institute for Law, Technology and Society at Tilburg University, The Netherlands.

**Don't Unplug** Chris Dancy, 2018-09-18 Chris Dancy, the world's most connected person, inspires readers with practical advice to live a happier and healthier life using technology. In 2002 Chris Dancy was overweight, unemployed and addicted to technology. He chain smoked cigarettes, popped pills and was angry and depressed. But when he discovered that his mother kept a record of almost every detail of his childhood, an idea began to form. Could knowing the status of every aspect of his body and how his lifestyle affected his health help him learn to take care of himself? By harnessing the story of his life, could he learn to harness his own bad habits? With a little tech know-how combined with a healthy dose of reality, every app, sensor and data point in Dancy's life was turned upside down and examined. Now he's sharing what he knows. That knowledge includes the fact that changing the color of his credit card helps him to use it less often and that nostalgia is a trigger for gratitude for him. A modern day story of rebirth and redemption. Chris' wisdom and insight will show readers how to improve their lives by paying attention to the relationship between how

we move what we eat who we spend time with and how it all makes us feel But Chris has done all the hard work Don't
