## APPLIED GRADUATE STUDIES

Language: **English**

Duration: **16 months**

Degree: **IFP School's MSc degree and possibly the partner institution's degree (for double-degree track)**

Did you know that understanding the architecture of reservoirs and rock-fluid interactions are key factors for optimizing production? The complementary skills of geoscientists and engineers are essential to its success. Through our Reservoir Geoscience and Engineering program, you'll master the methods and tools used to optimize more sustainable production of Oil & Gas fields, develop storage capacity for gas and CO<sub>2</sub>, and even produce new geothermal resources. Following your case-based training, you'll be recruited for your operational capabilities and your ability to lead projects in an international and multicultural environment. Accept the challenge!

## PARTNER INSTITUTIONS

- Texas A&M University (USA)
- Gubkin Russian State University of Oil & Gas (Russia)
- Tyumen State Oil & Gas University (Russia)
- Instituto Tecnológico de Buenos Aires (Argentina)
- Bandung Institute of Technology (Indonesia)
- Kazan Federal University (Russia)

The world demand for energy is constantly growing. The Oil & Gas industry is facing a key challenge: optimize Oil & Gas field production, both those already under production and those yet to be discovered.

Two professions are key players to improve the production of hydrocarbon reservoirs: reservoir geoscientist and reservoir engineer. They require multiple skills and are complementary. A reservoir geoscientist describes the architecture of the reservoirs and calculates the volume of trapped hydrocarbons. A reservoir engineer describes the fluids and proposes an optimum and sustainable development strategy. Moreover they will be able to innovate and work on multicultural and cross-cutting teams.

By choosing the IFP School Reservoir Geoscience and Engineering program, you can be a part of a great adventure. In an exceptional academic setting, you will follow a common core program

and optional modules that allows you to strengthen your specialization in geoscience or reservoir engineering. You can also opt for a partnership program with a foreign university: ITAMU - USA, Gubkin - Russia, Tyumen - Russia, ITBA - Argentina, ITB - Indonesia or KFU - Russia and graduate with a double degree.

The atmosphere at IFP School is cosmopolitan. In the Reservoir Geoscience and Engineering program, roughly 80% of the students are international and come from every continent. We firmly believe that this cultural mix stimulates the energies of both students and faculty. Our classes are taught in English and many of your projects will be conducted on multicultural teams.

The Reservoir Geoscience and Engineering program prepares you to deal with real situations. You will conduct numerous case studies based on real data from the field. You will deal with geological objects through practical field trips. You will also use industry-specific current software.

Students choosing the professions of reservoir geoscientist or reservoir engineer will ultimately work in international environments, that require high technical and geographic mobility. You can take advantage of the large variety of career opportunities with Oil & Gas operators, service and engineering companies, geothermal energy industry, etc.
