## **Ripples From The Zambezi Passion Entrepreneurship And The Rebirth Of Local Economies:**

*Ripples from the Zambezi* Ernesto Sirotli, 1999-04-01 After six years of economic development work in Africa Ernesto Sirotli witnessed how little most foreign aid programs were actually doing for the people they hoped to help from creating a communal tomato field on the banks of the Zambezi river only to be demolished by the river's hippos at harvest time to donating snow plows to African nations However well intentioned Sirotli points out inappropriate development often creates more problems than it solves Thus was the genesis of this exciting and unique alternative to traditional economic development termed Enterprise Facilitation where depressed communities can build hope and prosperity by first helping individuals to recognize their talents and business passion and then providing the skills to transform their dreams into meaningful and rewarding work

The Local Economy Solution Michael Shuman, 2015 Reinventing economic development as if small business mattered In cities and towns across the nation economic development is at a crossroads A growing body of evidence has proven that its current cornerstone incentives to attract and retain large globally mobile businesses is a dead end Even those programs that focus on local business through buy local initiatives for example depend on ongoing support from government or philanthropy The entire practice of economic development has become ineffective and unaffordable and is in need of a makeover The Local Economy Solution suggests an alternative approach in which states and cities nurture a new generation of special kinds of businesses that help local businesses grow These cutting edge companies which Shuman calls pollinator businesses are creating jobs and the conditions for future economic growth and doing so in self financing ways Pollinator businesses are especially important to communities that are struggling to lift themselves up in a period of economic austerity when municipal budgets are being slashed They also promote locally owned businesses that increase local self reliance and evince high labor and environmental standards The book includes nearly two dozen case studies of successful pollinator businesses that are creatively facilitating business and neighborhood improvements entrepreneurship local purchasing local investing and profitable business partnerships Examples include Main Street Genome which provides invaluable data to improve local business performance Supportland which is developing a powerful loyalty card for local businesses and Fledge a business accelerator that finances itself through royalty payments It also shows how the right kinds of public policy can encourage the spread of pollinator businesses at virtually no cost

**How to Start a Business & Ignite Your Life** Ernesto Sirotli, 2012-10-11 Have you ever wondered why companies such as Apple Disney eBay and Starbucks succeeded What common factors did they and most other successful startups share Dr Ernesto Sirotli one of the world's leading consultants on the topic of economic development has the answer None of the entrepreneurs who founded the world's

greatest companies did it on their own They put together an effective team that allowed their ventures to get off the ground flourish and grow And in his new book *How to Start a Business Ignite Your Life* Ernesto Sirotli has written down an easy to follow formula for success so that passionate people can transform their ideas into thriving businesses Ernesto Sirotli's approach to entrepreneurship is guided by the Trinity of Management a business model and philosophy based on the idea that there are three key areas in all companies product marketing and financial management A business has the greatest chance of achieving long term success when there is a team with the talent and knowledge needed to manage each area effectively The first half of the book provides an overview of this concept before delving more deeply into the three areas highlighting various personality traits and skills required for each role In the second half Dr Sirotli explains how these ideas can be practically applied to your startup enabling you to turn it into a prosperous enterprise Whether you are an aspiring entrepreneur or a current business owner looking to revitalize your company *How to Start a Business Ignite Your Life* will give you the tools you need to make a living by simply doing what you love

*If You Could Live Anywhere* Melody Warnick, 2022-07-26 Even when your job can be done from anywhere the place you call home still matters a lot By the old rules of work your dream career determines where you live If you want to make movies move to Los Angeles If you want to work in publishing you must be in New York And if you're launching a start up you'll only succeed in Silicon Valley But with the meteoric rise of remote and freelance work more people than ever are becoming location independent Even doctors teachers and other people in more traditional occupations have to make tough choices about where they settle because living in the right place can still make all the difference for your success and happiness So if work won't dictate where you live how will you ever decide *If You Could Live Anywhere* answers that question Melody Warnick

**The Routledge Handbook of Economic Theology** Stefan Schwarzkopf, 2020-03-24. This Handbook introduces and systematically explores the thesis that the economy, economic practices, and economic thought are of a profoundly theological nature. Containing more than 40 chapters, this Handbook provides a state-of-the-art reference work that offers students, researchers, and policymakers an introduction to current scholarship, significant debates, and emerging research themes in the study of the theological significance of economic concepts and the religious underpinnings of economic practices in a world that is increasingly dominated by financiers, managers, forecasters, market makers, and entrepreneurs. This Handbook brings together scholars from different parts of the world, representing various disciplines and intellectual traditions. It covers the development of economic thought and practices from antiquity to neoliberalism and provides insight into the economic theological teachings of major religious movements. The list of contributors combines well-established scholars and younger academic talents. The chapters in this Handbook cover a wide array of conceptual, historical, theoretical, and methodological issues and perspectives, such as the economic meaning of theological concepts (e.g., providence and faith), the theological underpinnings of economic concepts (e.g., credit and property), the religious significance of socio-economic practices in various organizational fields (e.g., accounting and work), and finally the genealogy of the theological-economic interface in Judaism, Christianity, Islam, and in the discipline of economics itself (e.g., Marx, Keynes, and Hayek). The Routledge Handbook of Economic Theology is organized in four parts: Theological concepts and their economic meaning; Economic concepts and their theological anchoring; Society, management, and organization; Genealogy of economic theology.

**Cities as Sustainable Ecosystems** Peter Newman, Isabella Jennings, 2012-09-26. Modern city dwellers are largely detached from the environmental effects of their daily lives. The sources of the water they drink, the food they eat, and the energy they consume are all but invisible, often coming from other continents, and their waste ends up in places beyond their city boundaries. *Cities as Sustainable Ecosystems* shows how cities and their residents can begin to reintegrate into their bioregional environment and how cities themselves can be planned with nature's organizing principles in mind. Taking cues from living systems for sustainability strategies, Newman and Jennings reassess urban design by exploring flows of energy, materials, and information along with the interactions between human and non-human parts of the system. Drawing on examples from all corners of the world, the authors explore natural patterns and processes that cities can emulate in order to move toward sustainability. Some cities have adopted simple strategies such as harvesting rainwater, greening roofs, and producing renewable energy. Others have created biodiversity.
