

Robin hood case

1. What is strategy?

Strategy is the right direction and scope of the organization in long term with achieving advantage in changing environment by resources and competences to fulfilling expectation of the stakeholders.

2. What strategic problems does Robin Hood have?

Strategic problems must be resolve to achieve mission of the organization. In the case robin hood face many problems that can become hurdle to achieve a goal.

- First issue is that revenues are down because travellers are avoiding routes through Sherwood forest.
- Costs are rising as new recruits are joining the band as a result in lack of supply of food and other necessary resources. Here the diseconomies of scale becoming a serious issue for the Robin hood.
- Due to the down revenue and high cost, Robin hood concerned about the successful continuation of mission - "rob from rich and give to the poor".
- His original group shared the common bond and values but the new recruit may have different value and reasons for joining the band.
- The sheriff, who is in the opposition getting stronger and getting better organizer

3. What is the role of the organizational leader as strategist and articulator of global goals?

Robin hood considered himself as a leader this gave him numerous duties toward the organization. He created the band and found the member who can work for organization. He was the final decision maker when it comes to delegate a task and responsibility. He created vision and vision for the band. He is the one who collected money from rich and gave to the poor.

Traveler Response to Transportation System Change Barton-Aschman Associates,1981

The Journal of Education ,1927 Lines of Thought Claudio Ferreira Costa,2014-06-30 Lines of Thought Rethinking

Philosophical Assumptions is a highly innovative and powerfully argued book According to the author noted Brazilian philosopher Claudio Costa many philosophical ideas that today are widely seen as old fashioned and outdated should not be dismissed but instead should be extensively reworked and reformulated This also means that contemporary analytical philosophy should begin to question many of its most cherished views and reconsider some of the current ways of looking at philosophy Following this path in the philosophy of language the author suggests replacing the causal historical view of proper names with a much more sophisticated form of descriptive internalist theory able to meet Kripke s challenges In epistemology he argues convincingly that we should return to the old traditional tripartite definition of knowledge reformulated in a much more complex form in which Gettier s problem would disappear The correct response to skepticism about the external world should not be to adopt new and more fanciful views but rather to carefully analyze the different kinds of reality attributions implied by the argument and responsible for its equivocal character In metaphysics he argues for a more complex reformulation of the traditional compatibilist approach of free will relating it intrinsically with the causal theory of action and making it powerful enough to assimilate the best elements of hierarchical views Finally according to the author contemporary analytic philosophy suffers from a lack of comprehensiveness In response to this the papers in this collection aim to restore something of a broader perspective salvaging isolated insights by integrating them into more comprehensive views
