**The splendour of power** J.A.W. Nicolay,2014-01-01 From the 5th to the 7th century AD the southern North Sea area functioned as an important cultural and political bridge linking two power blocks the late Roman Empire and its Frankish successor kingdom to the south and the Scandinavian kingdoms to the north This book examines how the region s intermediary position is reflected in the jewellery and other ornaments of gold and silver found along the southern North Sea coasts and how it relates to the formation of kingdoms and the expression of group identity after the collapse of the West Roman Empire The book first discusses the history of earlier research into kingship around the southern North Sea and this is followed by a description of the individual research regions the northern and western Netherlands northern Germany and southeast England After presenting the valuables of gold and silver from graves hoards and settlement sites with their dating and contextual evidence in an extensive catalogue the author examines how such items circulated between and within early medieval societies were transformed into symbols expressing regional or supraregional identities and eventually ended up in the ground The various research themes come together in the synthesis in which elite networks around the southern North Sea are reconstructed and the expression of ethnic or other group identities among the members of such networks is considered Finally in an epilogue the finds from the North Sea region are confronted with the nature and composition of the Staffordshire hoard For the first time not only presenting but also interpreting the superb collection of valuables from the southern North Sea area as a whole this book makes compulsive reading for anyone interested in the fascinating world of early medieval Europe

Transport Projects, Programmes and Policies John Nellthorp,Peter Mackie,2017-11-30 This title was first published in 2003 The European Union is constantly struggling to find effective ways to plan major transport infrastructure developments at a European level This is a critical factor in the emerging debates surrounding the absorption of the accession states into the EU but it is essential for these states that their economic competitiveness is supported by appropriate and effective transport infrastructure It is therefore crucial to find innovative approaches to the infrastructure itself how it is financed and the ways in which proper evaluation procedures are implemented to select which policies programmes and projects should be supported This

informative volume brings together leading international specialists in economic evaluation applied within the transport sector Their contributions encompass all the main levels at which transport planning is typically conceptualized strategic regional policy programme and project planning It therefore examines how coherent economic evaluation practice can be developed and applied not only across different physical scales but also across national borders

**Information Storage** Cornelia S. Große, Rolf Drechsler, 2019-11-19 This book examines some of the underlying processes behind different forms of information management including how we store information in our brains the impact of new technologies such as computers and robots on our efficiency in storing information and how information is stored in families and in society The editors brought together experts from a variety of disciplines While it is generally agreed that information reduces uncertainties and that the ability to store it safely is of vital importance these authors are open to different meanings of information computer science considers the bit as the information block neuroscience emphasizes the importance of information as sensory inputs that are processed and transformed in the brain theories in psychology focus more on individual learning and on the acquisition of knowledge and finally sociology looks at how interpersonal processes within groups or society itself come to the fore The book will be of value to researchers and students in the areas of information theory artificial intelligence and computational neuroscience

*Neurocognitive Profiling of Children with Specific or Comorbid Reading Disabilities* Bartholomeus J.A. de Groot, 2015-03-03 This study concerns the question whether different reading related neurocognitive profiles can be observed for reading proficiency based groups of children who attend the upper levels of Dutch primary education Besides distinguishing between normal to good reading children and children with Reading Disabilities RD subgroups are discerned for two frequently reported comorbidities of RD i.e. Attention Deficit Hyperactivity Disorder ADHD and Specific Language Impairment SLI The research of this PhD thesis is organized into two empirical sections on different branches of reading related neurocognitive research which are elaborated in five studies The first section focuses on the cognitive processes of phonemic awareness and rapid automatized naming and the first study specifically addresses the question as to how the

severity of RD affects the relative importance of these processes Additionally it is investigated how this works out for above average and excellent readers Involving the same processes the second and third study focus on the issue of comorbidity with SLI and ADHD The second section contains the fourth and fifth study which investigate the relatively novel link between word reading and two aspects of visual attention i e selective attention and orienting of attention In the general discussion the employed working model of reading is supplied with empirically based estimates of the neurocognitive effect sizes A main conclusion of the present study is that the addition of visual attention measurements to a phonological reading model provides an enhanced understanding of the cognitive basis of word reading and offers interesting new perspectives on differential diagnostic procedures and treatment planning Paul's Anthropology in Context Geurt Hendrik van
