Anorexia Nervosa and Bulimia Nervosa Pamela I. Swain, 2006 The abundance of food in the developed countries of the world has seemingly spawned an epidemic of disorders connected to the food. Extremes such as intensive concern about one's body image and total disregard for it have resulted in countries which contain enormous segments of the population who are either obese and proud of it or bordering on anorexia nervosa. This new book gathers state of the art research from leading scientists throughout the world which offers important information on understanding the underlying causes and discovering the most effective treatments for eating disorders. *Energy Research Abstracts*, 1981 Semiannual with semiannual and annual indexes. References to all scientific and technical literature coming from DOE its laboratories, energy centers and contractors. Includes all works deriving from DOE other related government sponsored information and foreign nonnuclear information. Arranged under 39 categories e.g. Biomedical sciences basic studies, Biomedical sciences applied studies, Health and safety and Fusion energy. Entry gives bibliographical information and abstract. Corporate author subject report number indexes. **People, Plants, and Landscapes** Kristen J. Gremillion, 1997-01-30. People, Plants and Landscapes showcases the potential of modern paleoethnobotany, an interdisciplinary field that explores the interactions between human beings and plants by examining archaeological evidence. Using different methods and theoretical approaches, the essays in this work apply botanical knowledge to studies of archaeological plant remains and apply paleoethnobotany to nonarchaeological sources of evidence. The resulting techniques often lie beyond the traditional boundaries of either archaeology or botany. With this ground breaking work, the technically and methodologically enhanced paleoethnobotany of the 1990s has joined forces with ecological and evolutionary theory to forge explanations of changing relationships between human and plant populations.
