Entre les pages de ce livre nous vous proposons d'aller à la rencontre de 15 distillateurs qu'bécois qui vous feront découvrir leur passion pour la création de ce qui s'avère parfois de véritables œuvres d'art en bouteille. Le guide inclut le code-barres de chaque produit compatible avec l'application de la SAQ Santé. **Women in Ancient Egypt**

Mariam F. Ayad, 2022-11-15 Cutting edge research by twenty-four international scholars on female power, agency, health and literacy in ancient Egypt. There has been considerable scholarship in the last fifty years on the role of ancient Egyptian women in society. With their ability to work outside the home, inherit and dispense of property, initiate divorce, testify in court and serve in local government, Egyptian women exercised more legal rights and economic independence than their counterparts throughout antiquity. Yet their agency and autonomy are often downplayed, undermined or outright ignored. In *Women in Ancient Egypt*, twenty-four international scholars offer a corrective to this view by presenting the latest cutting edge research on women and gender in ancient Egypt. Covering the entirety of Egyptian history from earliest times to Late Antiquity, this volume commences with a thorough study of the earliest written evidence of Egyptian women, both royal and non-royal, before moving on to chapters that deal with various aspects of Egyptian queens, followed by studies on the legal status and economic roles of non-royal women and finally on women's health and body adornment. Within this sweeping chronological range, each study is intensely focused on the evidence recovered from a particular site or a specific time period. Rather than following a strictly chronological arrangement, the thematic organization of chapters enables readers to discern diachronic patterns of continuity and change within each group of women. Counter-cartographies Leon J. Hilton, 2025-08-19 How to remake the world with neurodivergence at its heart What if we embraced neurodivergent ways of being not as deviations to be corrected but as vital ways of inhabiting the world What new realities might emerge Bringing a much needed humanistic perspective to the study of autism and other forms of neurodivergence Counter cartographies offers a bold reimagining of neurological difference moving beyond rigid diagnostic frameworks to uncover more expansive generative modes of existence Engaging the work of Fernand Deligny to trace how modern taxonomies of neurodivergence have hardened over time Leon J Hilton questions how these categories might instead serve as tools for remapping the world with neurodivergence at its center At the heart of Counter cartographies is an exploration of performance and performativity that reveals how the norm of neurotypical reality

is continually reinforced through acts of doing redoing and undoing Charting the historical shift away from mind and toward brain and moving fluidly across disciplines from digital art and documentary cinema to cybernetics and radical mental health movements Hilton illuminates the deep interconnections between performance perception and the historical construction of the neurotypical Through close readings of works by William Pope L Mel Baggs Wu Tsang and others Hilton also examines how neurodivergence has been represented embodied and materialized in contemporary art and media Restless engrossing and persistently attuned to moments of rupture when the neurotypical order falters Counter cartographies charts a path toward a more capacious imaginative world Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions

Politik als ästhetische Praxis Valérie Dietrich, 2022-10-07 Bilder und Narrative gehen zu unserer politischen Kultur Viele denken aber an Inszenierung den Schein oder reinen Symbolismus wenn man nach der Ästhetik in der Politik fragt Entgegen dieser Intuition arbeitet Valérie Dietrich die Produktivität und den konstitutiven Beitrag der Ästhetik für eine demokratische Politik heraus Mit Hilfe des radikaldemokratischen Politikbegriffs von Jacques Rancière bindet sie sie an die sinnliche Wahrnehmung zurück und setzt sie in ein Verhältnis zu den anderen Vermögen der menschlichen Vernunft Damit zeigt sie dass die Ästhetik ein zentraler Ort gesellschaftlicher Reflexivität ist von dem aus eine neue Politik beginnen kann Die stille Revolution Micha Knuth, 2025-04-14 In Frankreich gilt Marcel Gauchet als einer der wichtigsten Ideengeber seiner Generation Micha Knuth legt nun die erste Gesamtdarstellung von Gauchets Werdegang und seiner bahnbrechenden Geschichte der westlichen Demokratien vor Das Buch eröffnet darüber hinaus neue Perspektiven auf

Animals, Mind, and Matter Josephine Donovan, 2022-10-01 It's no secret that animals are considered objects in the fields of law commerce and science characterized as property and commodities **Animals Mind and Matter The Inside Story** challenges this ascription and establishes that animals are living subjects who have minds and opinions of their own and care

about what happens to them Donovan contends that animals voices or standpoints should be part of any human decisions concerning their ethical treatment Elaborating on feminist care theory and critical animal standpoint theory the author provides compelling evidence for animal subjectivity exploring in the process the nature of subjectivity and consciousness while drawing from recent developments in quantum and emergence theories that point away from the dominant ontology of Cartesian objectivism Through these explorations Donovan proposes that a new narrative is emerging in the arts and sciences an inside story that re subjectifies natural life and leaves behind the deadening Midas touch of Cartesian objectivism

Science and the Production of Ignorance Janet Kourany, Martin Carrier, 2020-02-18 An introduction to the new area of ignorance studies that examines how science produces ignorance both actively and passively intentionally and unintentionally We may think of science as our foremost producer of knowledge but for the past decade science has also been studied as an important source of ignorance The historian of science Robert Proctor has coined the term agnotology to refer to the study of ignorance and much of the ignorance studied in this new area is produced by science Whether an active or passive construct intended or unintended this ignorance is in Proctor s words made maintained and manipulated by science This volume examines forms of scientific ignorance and their consequences A dialogue between Proctor and Peter Galison offers historical context presenting the concerns and motivations of pioneers in the field Essays by leading historians and philosophers of science examine the active construction of ignorance by biased design and interpretation of experiments and empirical studies as seen in the false advertising by climate change deniers the virtuous construction of ignorance for example by curtailing research on race and gender related cognitive differences and ignorance as the unintended by product of choices made in the research process when rules incentives and methods encourage an emphasis on the beneficial and commercial effects of industrial chemicals and when certain concepts and even certain groups interests are inaccessible in a given conceptual framework Contributors Martin Carrier Carl F Cranor Peter Galison Paul Hoyningen Huene Philip Kitcher Janet Kourany Hugh Lacey Robert Proctor Londa Schiebinger Miriam Solomon Torsten Wilholt
