Harari attempts to capsulize humankind s and more specifically Homo Sapiens existence over two million years of existence He uses biology anthropology and sociology to link our ancestors from millennia past and tells a gripping tale of how different species of humankind at different times emerged developed and for some died off and disappeared totally from the face of the earth He explains how language culture and religion developed over hundreds of thousands of year even with the biological constants dictated by nature He offers compelling arguments on what made humans superior to other animals beyond just being able to walk upright and deftly use opposable thumbs Harari in his sweeping tale of birth survival and death categorically assumes the forces expounded in the evolutionary theories of Darwin and puts question marks on those milestones of human development that evolution cannot explain In a roughly chronological order he divides human progress into four distinct phases Read more *Homo Deus* Yuval Noah Harari,2016-09-08 THE MILLION COPY BESTSELLER
