Vasconcelos, 2015-08-27 Computational Economics A concise introduction is a comprehensive textbook designed to help students move from the traditional and comparative static analysis of economic models to a modern and dynamic computational study The ability to equate an economic problem to formulate it into a mathematical model and to solve it computationally is becoming a crucial and distinctive competence for most economists This vital textbook is organized around static and dynamic models covering both macro and microeconomic topics exploring the numerical techniques required to solve those models A key aim of the book is to enable students to develop the ability to modify the models themselves so that using the MATLAB Octave codes provided on the book and on the website students can demonstrate a complete understanding of computational methods This textbook is innovative easy to read and highly focused providing students of economics with the skills needed to understand the essentials of using numerical methods to solve economic problems It also provides more technical readers with an easy way to cope with economics through modelling and simulation Later in the book more elaborate economic models and advanced numerical methods are introduced which will prove valuable to those in more advanced study This book is ideal for all students of economics mathematics computer science and engineering taking classes on Computational or Numerical Economics *Modern Macroeconomics* Michael G. Christopher Tsoukis, 2020-10-22 Theory of Macroeconomic Policy reviews the theoretical foundations of macroeconomic fiscal and monetary policy It offers a panoramic view of macroeconomic theory covering a wide range of topics that are not customarily dealt with in macroeconomics texts as well as more standard material Advanced theory is bridged with more elementary or intermediate material and established models are reviewed alongside current research directions There is an extensive review of empirical evidence on virtually every topic supplemented by narrative accounts for various episodes The policy implications of the various theories are emphasised throughout The chapters are largely self contained so that different courses can focus at different places A Guidance for Further Study Section and extensive bibliography give plenty of ideas for all levels of independent study from Undergraduate Projects to MSc Dissertations to PhD Theses Theory of Macroeconomic Policy presents a balance between breadth as well as depth analytical treatment and intuition theory and evidence vintage theories and current directions theory and policy established theory and debate Theory of Macroeconomic Policy is an affirmation that there is a well developed body of theory that is invaluable for an in depth understanding of the macro economy and policy equally there is much scope for critical discussion and debate

Inclusive Economic Theory Ralph William (Bill) Pfouts, Steven Rosefielde, 2014-11-27 The goal of Inclusive Economics is to tie together various authoritative strands of contemporary economic theory into an easily comprehensible whole that illuminates the need for a broader approach to contemporary economic policymaking undistorted by obsolete 18th century rationalist assumptions about utility ethics worthiness and traditional culture This is accomplished by elaborating the rationalist competitive ideal along the optimizing lines pioneered by Paul Samuelson neoclassical economics plumbing modifications necessitated by Herbert Simon s realist concepts of bounded rationality and satisficing refined further by applying a pragmatist outlook to probe the consequences of relaxing Enlightenment teleological ethical spiritual and cultural taboos The exercise will explain why competitive market economies guided by rational utility seeking invariably are less productive efficient just and beneficent than most theorists concede and will illuminate the full range of interventions needed to achieve better outcomes We call this program in its entirety Inclusive Economics including the integration of micro and macroeconomics
