Baltes,2000-01-01 Advances in the biomedical sciences have raised pertinent and often paradoxical questions concerning the relationship between women s health and their rights This book based on the Round Table on Bioethics and Women held at UNESCO during the Fourth Session of the International Bioethics Committee IBC presents the experience of field workers and actors in areas as diverse as health legal affairs governance education and psychology It takes into account both the various stages of the biological life span and the insertion of women in a particular socio economic and cultural context Although the book does not claim to be exhaustive it shows to what extent the specificity of issues related to women in relation to bioethical issues has sometimes been underestimated Based on numerous socio cultural experiences throughout the world it also provides a useful general view for readers who wish to pursue research or studies in this field UNESCO website **Gender Bias, Missing Girls and Population Imbalance** Sneha Sangwan,Randhir Singh Sangwan,Mahima,2015-01-01 Even in 21st century sex imbalance sex discrimination female foeticide and sexselective abortions continue unabated despite the efforts made by governments Union as well as State from time to time The book based on empirical research is intended to examine differentials in sex composition and to plead for balancing of population sex component with specific reference to the State of Haryana which always stood for adverse sex ratio indicating status of women in the society This volume raises the emotive issue of thousands of missing girls in a developed State of Haryana who fail to appear on the social scene even before their birth The girls are being aborted at a massive scale in recent decades simply for a strong desire to have a son This raises many questions Does the issue of son preference still dominate the scene in a patriarchal society despite the substantial progress in female literacy Does the gender bias still persists among the educated and betteroff sections of society Are the sex selective technologies helping the couples to achieve the desired family size and sex composition To answer these questions it is imperative to highlight the socio economic and cultural factors responsible for daughter discrimination and the resulting implications The present book very succinctly has intended to emphasize the importance of population sex balance in improvement of regional socio economic systems and to suggest strategies to achieve the same based on adequate comprehension of conceptual grasp and analytical discourse on socio economic and demographic characteristics of regional population perception and awareness among people issues and concerns of skewed child sex ratio **Women, Security, South Asia** Farah Faizal,Swarna Rajagopalan,2005-10-03 This book explores women s perspectives on matters of security and related policy focusing on women in South Asia who are battling society insecurity and violence in some form The book makes three important contributions First it examines existing theories of security Secondly it goes beyond critique and narrative to seek concrete new agendas for empirical research in security studies Finally it brings together statistical ethnographic and survey data **Who Breaks a Butterfly upon a**
