Making Votes Count Strategic Coordination In The Worlds Electoral Systems Political Economy Of Institutions And Decisions:

Making Votes Count Gary W. Cox, 1997-03-28 Popular elections are at the heart of representative democracy. Thus understanding the laws and practices that govern such elections is essential to understanding modern democracy. In this book Cox views electoral laws as posing a variety of coordination problems that political forces must solve. Coordination problems and with them the necessity of negotiating withdrawals, strategic voting and other species of strategic coordination arise in all electoral systems. This book employs a unified game theoretic model to study strategic coordination worldwide and that relies primarily on constituency level rather than national aggregate data in testing theoretical propositions about the effects of electoral laws. This book also considers not just what happens when political forces succeed in solving the coordination problems inherent in the electoral system they face but also what happens when they fail. *Parties, Elections and Electoral Contests* Marc Guinjoan, 2016-05-13 According to the Duvergerian theories in the long run only viable parties are expected to stand for elections. Non viable parties should join a pre electoral coalition with another party or withdraw from competition entirely. Why then do non viable political parties throughout the world systematically continue presenting candidates? This book responds to this evident but unanswered question to create a general theory about deviations from the Duvergerian equilibrium. The author argues that far from being just a random or irrational decision the choice of political parties to present candidates when they do not expect to achieve representation can be explained by the overlap of electoral arenas that generate opportunities for viable parties to present candidates where they are non viable. In sum political parties will take advantage of their viability in an arena to present candidacies in other arenas where they do not have chances to become viable. The building of this new theory on electoral contamination allows the construction of a new and more encompassing conceptual framework through which to make sense of what until now has been understood as disparate phenomena and contributes to a better understanding of political parties strategic behaviour. **Handbuch Vergleichende Politikwissenschaft** Hans-Joachim Lauth, Marianne Kneuer, Gert Pickel, 2016-05-03 Das Handbuch Vergleichende Politikwissenschaft stellt erstmals im deutschsprachigen Raum Beiträge zu den wichtigsten Aspekten der Vergleichenden Politikwissenschaft zusammen. Neben der Darstellung der zentralen Begriffe und Kategorien sowie konzeptionellen und methodischen Ausführungen bietet der Band zudem Berücksichtigung der relevanten komparativen Forschungen und Forschungsergebnisse in den jeweiligen Bereichen. Mit über sechzig Beiträgen wird ein umfassender Überblick zur Entwicklung und aktuellen Situation dieser Teildisziplin gegeben. *The Elections In Israel* Alan Arian, Michal Shamir, The Elections in Israel 2003 brings together leading Israeli and North American social scientists and their state of the art in depth analysis of the 2003 Israeli national elections. These elections returned Ariel Sharon and the Likud to power amid one of the bloodiest rounds of conflict between Israel and the Palestinians and a severe economic downturn in Israel. Contributors analyze the

electoral behavior of the voters as a whole and various subgroups highlighting social cleavages and identity as well as issues and other strategic considerations Three chapters analyze in detail the Arab the national religious and the Russian vote The 2003 elections saw Israel's return to the family of parliamentary nations after it experimented with the direct election of the prime minister from 1996 through 2001 The impact of the adoption and repeal of this unique Israeli system of government is another major topic covered in this volume and several contributions explore the impact of these changes upon the electorate the party system and party financing Other unusual features of the 2003 elections were the low turnout levels among Jewish and Arab voters political moves to disqualify Arab candidates and lists from running for office which were overruled by the Supreme Court of Israel the collapse of the left the spectacular showing of the centrist Shinui party and the dominant status of the Likud in the Knesset and in Israeli politics Through its focus on the 2003 elections this volume also illuminates developments and changes in Israeli society and politics Many of these developments multiculturalism changes in social stratification the growing role of the judiciary and of the media and political reforms characterize other Western democracies as well and these are discussed from a comparative perspective The Elections in Israel 2003 will be of particular interest to those concerned with politics in Israel as well as those concerned with comparative politics and elections in general Asher Arian is Distinguished Professor of Political Science at the Graduate Center of the City University of New York a senior research fellow at the Israel Democracy Institute and professor of political science at the University of Haifa Michal Shamir is professor of political science at Tel Aviv University

Timber Booms and Institutional Breakdown in Southeast Asia Michael L. Ross, 2001-01-08 Scholars have long studied how institutions emerge and become stable But why do institutions sometimes break down In this book Michael L. Ross explores the breakdown of the institutions that govern natural resource exports in developing states He shows that these institutions often break down when states receive positive trade shocks unanticipated windfalls Drawing on the theory of rent seeking he suggests that these institutions succumb to a problem he calls rent seizing the predatory behavior of politicians who seek to supply rent to others and who purposefully dismantle institutions that restrain them Using case studies of timber booms in Indonesia Malaysia and

the Philippines he shows how windfalls tend to trigger rent seizing activities that may have disastrous consequences for state institutions and for the government of natural resources More generally he shows how institutions can collapse when they have become endogenous to any rent seeking process **Handbook of New Institutional Economics** Claude Ménard, Mary M. Shirley, 2008-06-27 New Institutional Economics NIE has skyrocketed in scope and influence over the last three decades This first Handbook of NIE provides a unique and timely overview of recent developments and broad orientations Contributions analyse the domain and perspectives of NIE sections on legal institutions political institutions transaction cost economics governance contracting institutional change and more capture NIE s interdisciplinary nature This Handbook will be of interest to economists political scientists legal scholars management specialists sociologists and others wishing to learn more about this important subject and gain insight into progress made by institutionalists from other disciplines This compendium of analyses by some of the foremost NIE specialists including Ronald Coase Douglass North Elinor Ostrom and Oliver Williamson gives students and new researchers an introduction to the topic and offers established scholars a reference book for their research *Comparing Democracies* Lawrence LeDuc, Richard G Niemi, Pippa Norris, 2014-04-07 This book provides you with a theoretical and comparative understanding of the major topics related to elections and voting behaviour It explores important work taking place on new areas whilst at the same time covering the key themes that you ll encounter throughout your studies Edited by three leading figures in the field the new edition brings together an impressive range of contributors and draws on a range of cases and examples from across the world It now includes New chapters on authoritarian elections and regime change and electoral integrity A chapter dedicated to voting behaviour Increased emphasis on issues relating to the economy Comparing Democracies Fourth Edition will remain a must read for students and lecturers of elections and voting behaviour comparative politics parties and democracy *Conquests and Rents* Faisal Z. Ahmed, 2023-06-15 Why are many Muslim majority societies prone to dictatorship and violence The reason is not Islam but institutions and government finances *A Theory of the State* Yoram Barzel, 2002 This book models the emergence of the state and the forces that shape it *African Economies and the Politics of Permanent Crisis, 1979-1999* Nicolas Van de Walle, 2001-09-24 This 2001 book explains why African countries have remained mired in a disastrous economic crisis since the late 1970s It shows that dynamics internal to African state structures largely explain this failure to overcome economic difficulties rather than external pressures on these same structures as is often argued Far from being prevented from undertaking reforms by societal interest and pressure groups clientelism within the state elite ideological factors and low state capacity have resulted in some limited reform but much prevarication and manipulation of the reform process by governments which do not really believe that reform will be effective which often oppose reforms because they would undercut the patronage and rent seeking practices which undergird political authority and which lack the administrative and technical capacity to implement much reform Over time state decay has increased *What Does*

Appointing Central Bankers Kelly H. Chang, 2003-08-18 This book examines monetary policy by focusing on how the President and the Senate influence monetary policy by appointing Fed members The book attempts to answer three questions about the appointment process and its effects First do politicians influence monetary policy via Fed appointments Second who influences the process the President alone or both the President and the Senate Third what explains the structure of the Fed appointment process The study extends the analysis of the Fed to the European Central bank When Majorities Fail Josephine T. Andrews, 2002-10-21 When Majorities Fail is a study of institutional failure in Russia s first democratic legislature Inadequate rules and a chaotic party system combined to make it nearly impossible to pass a coherent legislative program including a new constitution The internal instability in Russia s parliament is known as cycling one of the most important theoretical concepts in formal study of legislatures There are few recorded cases of cycling in politically important settings This book documents the presence of cyclical majorities in Russian Parliament with comprehensive case and statistical analysis and demonstrates how the failure to adopt a new constitution led to the confrontation between parliament and president in the fall of 1993 Earlier research has shown that the design of a legislative institution is crucial in preventing cycling The author shows how the institutional design of the parliament failed underscoring the importance of

institutional design in a democratic transition The Oxford Handbook of Public Choice Roger D. Congleton, Bernard Grofman, Stefan Voigt, 2019 This two volume collection provides a comprehensive overview of the past seventy years of public choice research written by experts in the fields surveyed The individual chapters are more than simple surveys but provide readers with both a sense of the progress made and puzzles that remain Most are written with upper level undergraduate and graduate students in economics and political science in mind but many are completely accessible to non expert readers who are interested in Public Choice research The two volume set will be of broad interest to social scientists policy analysts and historians *Election Timing* Alastair Smith, 2004-07-19 Endogenous election timing allows leaders to schedule elections when the time is right The author proposes and tests an informational theory of endogenous election timing that explains when leaders call for elections and the consequences of their decisions In particular he argues that if all else is equal leaders announce elections when they anticipate a decline in their future performance As a consequence early elections signal a leader's lack of confidence in future outcomes The earlier elections occur relative to expectations the stronger the signal of demise Using data on British parliaments since 1945 the author tests hypotheses related to timing of elections electoral support and subsequent economic performance Leaders who call elections early relative to expectations experience a decline in their popular support relative to pre announcement levels experience worse post electoral performance and have shorter campaigns
