Public Health and Beyond in Latin America and the Caribbean Sherri L. Porcelain, 2021-10-01 Public Health and Beyond in Latin America and the Caribbean Reflections from the Field explores the diverse and complex public health landscape from global to regional to local by considering historical and socio cultural factors to contextualize the ongoing public health crisis Drawing on four decades of field experience research and teaching

Sherri L Porcelain uses case studies to offer a realistic view of the public health struggle in Latin America and the Caribbean. Using specific countries as regional examples, the book shows how population health has been inextricably linked to political, economic, social, cultural, ethical, ecological, environmental, and technological factors. Chapters in this book will examine the history of public health issues associated with international development, globalization, and the international political economy, disasters, diplomacy, and security studies, coupled with the changing role of key actors driving the global and regional agendas. The final chapter examines the impact of the COVID-19 pandemic and what it means for the future of public health. This book is recommended for undergraduate students interested in the history of Latin America and the Caribbean as well as others concerned with global and regional population health challenges. **Foreign Assistance Oversight** United States. Tackling Children's Food Insecurity in the Highlands of Guatemala with Schoolyard Permaculture Gardens Bridget Lawrason Meigs, 2004. Making services work for poor people World Bank, Big Food Simon N. Williams, Marion Nestle, 2017-10-02. Obesity is a global public health problem of crucial importance. Obesity rates remain high in high-income countries and are rapidly increasing in low and middle-income countries. Concurrently, the global consumption of unhealthy products such as soft drinks and processed foods continues to rise. The ongoing expansion of multinational food and beverage companies or Big Food is a key factor behind these trends. This collection provides critical insight into the global expansion of Big Food, including its incursion into low and middle-income countries. It examines the changing dynamics of the global food supply and discusses how low-income countries can alter the Big Food diet from the bottom up. It examines a number of issues related to Big Food marketing strategies, including the way in which they advertise to youths and the rural poor. These issues are discussed in terms of their public health implications and their relation to public health activities, for example, soda taxes and the promotion of nutritionally healthier products. This book was originally published as a special issue of *Critical Public Health*. *Underbelly* Rachel Hall-Clifford, 2024-05-14. An unsettling exploration of the hidden power dynamics of global health seen through the lens of childhood diarrhea and its treatment within the Guatemalan context. Deaths from childhood diarrhea seem

preposterous in high income countries Yet for children under five years old in the rest of the world diarrhea is the third highest cause of mortality Despite a glut of prevention and treatment programming spanning more than forty years this least glamorous of global health ills remains a critical problem In *Underbelly* Rachel Hall Clifford takes a hard look at the pathways of global health funding and development policies and the outcomes they deliver for recipient individuals and communities Drawing on fifteen years of ethnographic research in highland Guatemala Hall Clifford focuses on the provision of primary health care services as a critical exemplar of how global health and development programs fall short Guatemala has a fragmented health system the author explains that guarantees health as a human right but also suffers from systemic racism inadequate health services and access to those services community distrust from a legacy of harm and violence and a demeaning paternalism Bringing together the discourses of global health and medical anthropology *Underbelly* explores the ways in which global health its actors structures and systems perpetuates the challenges it purports to fix this is the underbelly Hall Clifford argues that global health programs conceived in offices distant from the places in which they are delivered often have unintended consequences and contribute to pluralistic and exclusionary health systems that mirror neoliberal economies She argues that if we are to fix this entrenched crisis of health inequity we must use the immense resources of global health to center local communities as drivers of change With a foreword written by Waleska Lopez Canu an Indigenous Maya medical director and an afterword by Arthur Kleinman renowned expert in global health this book underscores the importance of looking deeper into what seems on its surface incontrovertibly good to understand the more complex realities on the ground and in people's lives

The Economics of Climate-Resilient Development Sam Fankhauser, Thomas K.J. McDermott, 2016-07-27 Some climate change is now inevitable and strategies to adapt to these changes are quickly developing The question is particularly paramount for low income countries which are likely to be most affected This timely and unique book takes an integrated look at the twin challenges of climate change and development The book treats adaptation to climate change as an issue of climate resilient development rather than as a bespoke set of activities flood defences drought plans and so on combining climate and development challenges into a single strategy It asks how the standard approaches to development need to change and what socio economic trends and urbanisation mean for the vulnerability of developing countries to climate risks Combining conceptual thinking with practical policy prescriptions and experience the contributors argue that to address these questions climate risk has to be embedded fully into wider development strategies

Dealing with Peace Simon Granovsky-Larsen, 2019-03-20 *Dealing with Peace* presents the struggles of the Guatemalan campesino peasant social movement during the country's post conflict transition from 1996 to the present focusing on efforts to obtain land and improve livelihoods within a shifting yet consistently hostile political economic environment With special focus on the relationship between the movement and the neoliberal state Simon Granovsky Larsen asks whether the acceptance of neoliberal resources in this case support for land access in Guatemala

provided by the World Bank funded Fondo de Tierras reduces the potential for social movements to continue to work for transformative change Positioned in contrast to studies warning that social movements cannot maintain their original vision after accepting such support this book argues that organizations within the Guatemalan campesino movement have engaged strategically with neoliberalism utilizing available resources to advance visions of social change Using a wealth of primary data collected over more than a year of fieldwork it contributes significantly to the study of Guatemalan politics and advances understandings of the grounded operation of neoliberalism Exploring both the dynamics of a national neoliberal transition and the ways in which these play out within civil society *Dealing with Peace* reveals the long term and often contradictory negotiation of political and economic transitions
