Managing knowledge Katrin Lenz,2002-02-19 Inhaltsangabe

Abstract In an economy where the only certainty is uncertainty the sure source of lasting competitive advantage is knowledge Peter Drucker 1953 Companies like Microsoft Netscape Coca Cola and Yahoo can be found under the top U S companies with the highest market values in 1999 The market value represents the measure of value that the investors and markets associate with the company However these companies are not valued for their tangible assets buildings inventory etc they are valued for something which cannot be shown on a balance sheet their intangibles These include brand recognition Patents customer loyalty innovative business ideas past achievements etc These companies are valued for the knowledge they possess However knowledge is of little value if it cannot be found when needed Therefore a successful knowledge management concept is of crucial importance for these companies The knowledge management market is growing rapidly and it will continue to advance over the next years Knowledge management is still a relatively young field with new concepts emerging constantly Most knowledge management initiatives have focused entirely on changes in tools and technologies such as intranets and Lotus Notes But knowledge management is more complex it covers everything the company does to make knowledge available to everyone The twenty first century gives companies the tools and connectivity to easily obtain share and act on information quickly Knowledge management uses these possibilities and recent studies showed that companies gained a competitive advantage by implementing it According to Accenture research a well implemented knowledge management process can improve employee productivity by an average of 60% Often knowledge management is seen as storing documents in a database thus hoping to enhance knowledge sharing through the implementation of technology But to successfully apply knowledge management companies need to implement a process of motivating and inciting people to share information The old saying Knowledge is power is still popular The people who are hoarding their knowledge believe that it makes them irreplaceable However real power does not come from knowledge kept but from knowledge shared People are expected to cooperate to be open to participate within the new economy but resistance can be expected Obviously knowledge management is a combination of Intelligent Enterprises of the 21st Century Jatinder N. D. Gupta, Sushil Kumar Sharma, 2004-01-01 This work brings together knowledge from many parts of the world to provide theoretical and applied concepts methodologies and techniques that help diffuse skills required to create intelligent enterprises of the 21st century for gaining sustainable competitive advantage in a global environment
