Management Education and Automation Denise Tsang, Hamid Kazeroony, 2021-08-26 Due to automation nearly half of the jobs will vanish over the next two decades in the US However the problem is not confined to any particular country Management educators in higher education are faced with two fundamental questions a how we prepare our students for new required technology competencies when conducting international business and b how we work with new technologies to prepare our students While the next generation of employees requires competencies in working with artificial intelligence relying on data analytics the emergence of artificial intelligence and new technologies in augmenting teaching is changing the nature of higher education across the globe Management Education and Automation explores international management education in light of exponential development of artificial intelligence big data demographic shifts expansion of robotic utilization in many economic sectors aging populations and negative population growth in developed economies multipolar international political systems migration patterns and fundamental shifts in individual and social interactions via digital media It shows the latest state of knowledge on the topic and will be of interest to researchers academics policymakers and students in the fields of international business and management globalization management education and management of technology and innovation *Human Factors of a Global Society* Tadeusz Marek, Waldemar Karwowski, Marek

Frankowicz, Jussi Kantola, Pavel Zgaga, 2014-06-02 During the last 60 years the discipline of human factors HF has evolved alongside progress in engineering technology and business Contemporary HF is clearly shifting towards addressing the human centered design paradigm for much larger and complex societal systems the effectiveness of which is affected by recent advances in engineering science and education Human Factors of a Global Society A System of Systems Perspective explores the future challenges and potential contributions of the human factors discipline in the Conceptual Age of human creativity and social responsibility Written by a team of experts and pioneers this book examines the human aspects related to contemporary societal developments in science engineering and higher education in the context of unprecedented progress in those areas It also discusses new paradigms for higher education including education delivery and administration from a systems of systems perspective It then examines the future challenges and potential contributions of the human factors discipline While there are other books that focus on systems engineering or on a specific area of human factors this book unifies these different perspectives into a holistic point of view It gives you an understanding of human factors as it relates to the global enterprise system and its newly emerging characteristics such as quality system complexity evolving management system and its role in social and behavioral changes By exploring the human aspects related to actual societal developments in science the book opens a new horizon for the HF community **Universities, Sustainability and**

Society: Supporting the Implementation of the Sustainable Development Goals Walter Leal Filho, Amanda Lange Salvia, Luciana Brandli, Ulisses M. Azeiteiro, Rudi Pretorius, 2021-05-03 In order to yield the expected benefits sustainability

initiatives need to be undertaken by means of a close cooperation between universities on the one hand and societal partners on the other. The principle of co creation and co execution of sustainability initiatives increases the value for all by mutual learning and the sharing of expertise and resources. But pursuing sustainability initiatives with a community and societal involvement is not simple. There is a perceived need for a better understanding of how universities can interact with society in order to support the implementation of the UN Sustainable Development Goals. This book is an attempt to address this need by a novel approach which focuses on current potentials and challenges across a wide range of fields and expertise. The book focuses on how the theory and practice of sustainable development interact and shows the need for a continuation of the dialogue among sustainability academics and practitioners so as to address the issues matters and problems at hand. The spectrum of themes addressed on this book also entails how environmental values and ethics are applied and the relationship between social biological and cultural diversity. It also includes a broad disciplinary approach to sustainability including education research and case studies and the links with human environment relations in a sustainable development context.

Business Ethics and Organizational Values O. Thyssen, 2009-05-29 Organizational values are a hot topic as private and public organizations are not only evaluated according to their products and profits but also according to the circumstances of the product labour conditions materials risks human rights and social responsibility. Values are becoming the defining identity of organizations.
