managerial processes and competitive strategy **Non-Knowledge Risk and Bank-Company Management** Vincenzo Formisano, 2016-01-26 In the current economic scenario the intangible assets contribute significantly to the construction of the competitive positioning of a company It follows that this intangible information must be appropriately considered in the internal rating system IRSs Currently key aspects of business risk and operational risk such as potential for growth competitive capabilities core competencies role in the supply chain of membership and governance are being considered as secondary in this system Intangible factors such as the milieu of the company and the environment in which it operates are not being appropriately considered In this book Vincenzo Formisano proposes new guidelines aimed to set desirable IRSs in which the weight of intangible assets is appropriately and properly valued He addresses practical rules for achieving a rating system capable of understanding and enhancing the intangible assets of a company and for the assessment of creditworthiness The first part of the book focuses on existing practices the second part exposes a general model for the classification and interpretation of intangibles The third part provides practical guidelines designed to configure desirable rating models in which the weight of intangible assets is correctly considered This book offers theoretical and practical insights and an easy to read approach which provides a valuable source of information for teachers and students in Finance It is also a useful reference point for the Banking Accounting and Finance managerial communities *Tropical food chains* Ruerd Ruben, Martinus van Boekel, Aad van Tilburg, Jacques Trienekens, 2023-08-28 International supply chains of vulnerable tropical food products face major problems in the fields of quality performance and coordination between supply chain partners Degradation and variability of quality segmentation of supply networks and scattered production by smallholder producers could severely hinder reliable deliveries at required standards Concerted efforts for improving governance regimes and management practices are required to enhance supply chain performance This book provides a comprehensive overview of the interfaces between market outlet choice supply chain governance quality management and value added distribution Main attention is given to better incentives and transparency in contracts and bargaining procedures that could contribute to reduced transaction costs and risk as well as techno managerial strategies for improving both quality and value added The editors present an integrated interdisciplinary framework for the simultaneous analysis of technical managerial and socio economic dimensions of international supply chain originating in developing countries Selected case studies based on extensive field research highlight in Costa Rica mango and pepper Ivory Coast pineapples Kenya fish Ethiopia dairy Ghana cocoa India cashew and China vegetables and pork provide detailed insights in different options for enhancing integrated quality management and supply chain coordination Professionals and practioners involved in the design management and assessment of inter national supply chains for tropical products will particularly benefit from this unique collection

Resources in Education , 1995 **Transfer Pricing Aspects of Intra-Group Financing** Raffaele Petruzzi, 2013-10-20 For corporate managers maximization of the profits and the market value of the firm is a prime objective The logical working

out of this principle in multinational enterprises has led to an intense focus on transfer pricing between related companies principally on account of the very attractive tax advantages made possible. Inevitably numerous countries have established transfer pricing legislation designed to combat the distortions and manipulations that are inherent in such transactions. This important book, one of the first in depth analysis of the current worldwide working of transfer pricing in intra group financing and its resonance in law, presents the relevant issues related to loans, financial guarantees and cash pooling, analyses an innovative possible approach to these issues and describes new methodologies that can be implemented in practice in order to make intra group financing more compliant with efficient corporate financing decisions and the generally accepted OECD arm's length principle. Comparing the tax measures implemented in the corporate tax law systems of forty countries, this study investigates such aspects of intra group financing as the following: corporate finance theories, studies and surveys regarding financing decisions, application of the arm's length principle to limit the deductibility of interest expenses, impact of the OECD's Base Erosion and Profit Shifting (BEPS) project, transfer pricing issues related to intra group financing, credit risk in corporate finance, rationales utilized by credit rating agencies and the assessment of arm's length nature of intra group financing. The author describes ways in which the application of the arm's length principle can be strengthened and how the related risk of distortion and manipulation can be minimized. The solutions and methodologies proposed are applicable to any business sector. Given that determination of the arm's length nature of transactions between related companies is one of the most difficult tasks currently faced by taxpayers and tax administrations around the world, this thorough assessment and analysis will prove extraordinarily useful for in-house and advisory practitioners, corporate officers, academics, international organizations and government officials charged with finding effective responses to the serious issues raised. In addition to its well researched analysis, the book's comparative overview of how loans, financial guarantees and cash pooling are currently addressed by OECD Member States and by their national courts is of great practical value in business decision making.

Diversification, Refocusing, and Economic Performance Constantinos Markides, 1995. This work examines the causes and consequences of the refocusing phenomenon where companies have stopped diversifying and begun focusing once more on their core product lines. Coverage includes a discussion of the effects of refocusing on market value, profitability and organizational structure.
