## **Macroeconomics By Arnold 9th Edition:**

*Economics for Policy Makers* Gustavo Rinaldi, 2019-04-16 Certain key economic decisions taken by organizations and indeed countries are often not made by economists but by businessmen trade unionists politicians and policy makers Those who employ people those who represent workers those who make laws and those who elect them need economics but may have little time or desire to study it This book makes economics easily available to everyone The author's use of simple language and avoidance of technical jargon provides non economists with a better understanding of economic reasoning and the tools to know and to decide The author achieves this through introducing key concepts in short presentations and arming the reader with selected press articles and recent research using these concepts An analysis of these demonstrates how a general concept can be derived from a specific context and highlighted questions provide the basis for further debate The reader can then focus on the parts most relevant to their own needs This book will have great appeal to employers trade unionists and public officials attending courses organized by international institutions professional training providers as well as graduate students of courses where economics is an important element especially in relation to its policy implications Finally it is invaluable for anybody who has wanted to learn the basics of practical economics but has been deterred by its technicalities

**The Structure of Investment Arbitration** Tony Cole,2013-07-24 Although a State s treatment of foreign investors has long been regulated by international law it is only recently that international investment law has emerged as an independent discipline in its own right In recent decades the practical success of investment arbitration has allowed international investment law to develop both its own cadre of academic and professional specialists and its own legal doctrines This book analyses the structure of international investment law as it has developed through the practice of investment arbitration in order to see how a variety of international investment law doctrines should be understood and applied The book demonstrates how a structural analysis can shed light on several major controversies within investment law and also examines what an investment actually is The book offers an original interpretative approach to the resolution of problems in international investment law and so is one of the few books within the field to attempt to give investment law a solid theoretical basis It also focuses on only a select number of problems rather than attempting to deliver the universal coverage currently popular for investment law books As a result those issues that are addressed get a detailed discussion rarely available in competing texts
