Malaysia International Monetary Fund. Asia and Pacific Dept,2019-03-08 This Article IV Consultation highlights that the Malaysian economy has shown resilience and continues to perform well Policy priorities are governance reforms and fiscal consolidation while safeguarding growth and financial stability Structural reforms are needed to boost productivity and help further rebalancing growth towards domestic demand Domestic demand is expected to remain the main driver of growth over the medium term Risks to the outlook are to the downside and stem mainly from external sources The paper also discusses that with growth returning to sustainable levels and no underlying inflation pressures maintaining the current broadly neutral monetary policy stance is appropriate Exchange rate flexibility should remain the first line of defence against external shocks Also governance reforms should be anchored in legislation to ensure the independence of anti corruption institutions and appropriate separation of powers Focus should be on improving the transparency and efficiency of public services

Sovacool,C. J. Cooper,2013-07-01 Benjamin Sovacool and Christopher Jon Cooper have produced an astonishing and well written book based on extensive

original research in twelve countries They explore the technical social political and economic dimensions of four energy megaprojects The large scale of megaprojects always appears to complicate the decision making process and often causes failures Megaprojects may even reinforce corruption and erode democracy It highlights that today s experiences can be explained by statements by Aristotle and Einstein who argue both in their own way that it is always wise to take the limits of size into account and to reduce the size of projects wherever this is possible For everybody involved in megaprojects this book must be read Hugo Priemus Delft University of Technology The Netherlands Based on extensive original research this book explores the technical social political and economic dimensions of four Asian energy megaprojects a regional natural gas pipeline network in Southeast Asia a series of hydroelectric dams on the island of Borneo an oil pipeline linking Europe with the Caspian Sea and a very large solar energy array in the Gobi desert This book investigates why energy megaprojects fail to deliver their promised benefits It offers the first comprehensive assessment of the complicated dynamics driving and constraining megaprojects initiated in the rapid scramble for energy resources and efforts to improve energy security The authors approach the assessment of megaprojects from a socio technical angle emphasizing broad issues of political leadership regulation financing interest group opposition and environmental impact as well as conventional technological factors such as engineering design and project management The Governance of Energy Megaprojects will prove insightful for academics concerned about energy policy energy security environmental impact and technology assessment But the book should prove equally compelling to those engaged in the practical management and implementation of large scale energy projects anywhere in the world
