evaluation asks how acceptable a line of reasoning is how adequate relevant and convincing the evidence is McGregor sought to find out what makes a good manager by evaluating different management approaches their assumptions about human behavior and effects they had In his view management approaches could be roughly broken down into two theories Theory X which held a negative idea of employee motivations and Theory Y which made positive assumptions about them In McGregor's evaluation Theory Y produced markedly better results in productivity and other measurable areas On this basis McGregor reasoned out a strong persuasive argument for adopting Theory Y strategies on a grand scale
