Simpson,2016-04-27 Enterprise Level Security Securing Information Systems in an Uncertain World provides a modern alternative to the fortress approach to security The new approach is more distributed and has no need for passwords or accounts Global attacks become much more difficult and losses are localized should they occur The security approach is derived from **Who Governs the Globe?** Deborah D. Avant,Martha Finnemore,Susan K.

Sell, 2010-06-03 Academics and policymakers frequently discuss global governance but they treat governance as a structure or process rarely considering who actually does the governing This volume focuses on the agents of global governance global governors The global policy arena is filled with a wide variety of actors such as international organizations corporations professional associations and advocacy groups all seeking to govern activity surrounding their issues of concern Who Governs the Globe lays out a theoretical framework for understanding and investigating governors in world politics It then applies this framework to various governors and policy arenas including arms control human rights economic development and global education Edited by three of the world's leading international relations scholars this is an important contribution that will be useful for courses as well as for researchers in international studies and international organizations

**Constitutional Law and the Politics of Ethnic Accommodation** Bashir Mobasher, 2023-12-29 This book explores whether the legal and political institutions of Afghanistan were able to incorporate diverse ethnic groups into the political process Ethnic accommodation has gained central stage in the literature on institutional design and democratic consolidation However some divided societies are more explored than others and Afghanistan is one understudied country that is critically important for testing and improving our theories of institutional design in a democratizing plural society This work examines the Constitution of 2004 and those provisions of electoral laws and political party laws that together devised Afghan political institutions including those of the presidential system unitary government electoral systems as well as the party system It argues that due to their incongruence in design and effects the Afghan political institutions failed to fully accommodate ethnic groups in the political process This book adopts a holistic approach while also paying careful attention to the details of each of the individual pieces of political institutions designed by the Constitution of 2004 Taken together this approach yields insights into the boundaries and interactions of institutional design and how their interactions hinder or advance ethnic accommodation in varying contexts The book will be essential reading for academics researchers and policy makers interested in constitutional law and politics

*Innovative Design of Electrical Devices* Slawomir Wiak, Ewa Napieralska Juszczak, 2010-10-29 Computational Methods for the

Innovative Design of Electrical Devices is entirely focused on the optimal design of various classes of electrical devices. Emerging new methods like e.g. those based on genetic algorithms are presented and applied in the design optimization of different devices and systems. Accordingly the solution to field analysis problems is based on the use of finite element method and analytical methods as well. An original aspect of the book is the broad spectrum of applications in the area of electrical engineering especially electrical machines. This way traditional design criteria of conventional devices are revisited in a critical way and some innovative solutions are suggested. In particular the optimization procedures developed are oriented to three main aspects: shape design, material properties identification, machine optimal behaviour. Topics covered include: New parallel finite element solvers, Response surface method, Evolutionary computing, Multiobjective optimization, Swarm intelligence, MEMS applications, Identification of magnetic properties of anisotropic laminations, Neural networks for non destructive testing, Brushless DC motors, transformers, Permanent magnet disc motors, magnetic separators, Magnetic levitation systems.

Interactive Multimedia Music Technologies Ng, Kia, Nesi, Paolo, 2007-10-31. This book illustrates how interactive music can be used for valorizing cultural heritage content and archives not currently distributed due to lack of safety suitable coding or conversion technologies. It explains new methods of promoting music for entertainment, teaching, commercial and non commercial purposes and provides new services for those connected via PCs, mobile devices, whether sighted or print impaired.
