How To Study Public Life Jan Gehl:

How to Study Public Life Jan Gehl, Birgitte Svarre, 2013-12-04 How do we accommodate a growing urban population in a way that is sustainable equitable and inviting This question is becoming increasingly urgent to answer as we face diminishing fossil fuel resources and the effects of a changing climate while global cities continue to compete to be the most vibrant centers of culture knowledge and finance Jan Gehl has been examining this question since the 1960s when few urban designers or planners were thinking about designing cities for people But given the unpredictable complex and ephemeral nature of life in cities how can we best design public infrastructure vital to cities for getting from place to place or staying in place for human use Studying city life and understanding the factors that encourage or discourage use is the key to designing inviting public space In *How to Study Public Life* Jan Gehl and Birgitte Svarre draw from their combined experience of over 50 years to provide a history of public life study as well as methods and tools necessary to recapture city life as an important planning dimension This type of systematic study began in earnest in the 1960s when several researchers and journalists on different continents criticized urban planning for having forgotten life in the city City life studies provide knowledge about human behavior in the built environment in an attempt to put it on an equal footing with knowledge about urban elements such as buildings and transport systems Studies can be used as input in the decision making process as part of overall planning or in designing individual projects such as streets squares or parks The original goal is still the goal today to recapture city life as an important planning dimension Anyone interested in improving city life will find inspiration tools and examples in this invaluable guide

How to Study Social Life Russell Hitchings, Alan Latham, 2024-12-28 This text is both a practical account of the research process and an invitation to think more deeply and reflexively about the imperfect multifaceted nature of social research itself

Cities for People Jan Gehl, 2013-03-05 For more than forty years Jan Gehl has helped to transform urban environments around the world based on his research into the ways people actually use or could use the spaces where they live and work In this revolutionary book Gehl presents his latest work creating or recreating cityscapes on a human scale He clearly explains the methods and tools he uses to reconfigure unworkable cityscapes into the landscapes

he believes they should be cities for people Taking into account changing demographics and changing lifestyles Gehl emphasizes four human issues that he sees as essential to successful city planning He explains how to develop cities that are Lively Safe Sustainable and Healthy Focusing on these issues leads Gehl to think of even the largest city on a very small scale For Gehl the urban landscape must be considered through the five human senses and experienced at the speed of walking rather than at the speed of riding in a car or bus or train This small scale view he argues is too frequently neglected in contemporary projects In a final chapter Gehl makes a plea for city planning on a human scale in the fast growing cities of developing countries A Toolbox presenting key principles overviews of methods and keyword lists concludes the book The book is extensively illustrated with over 700 photos and drawings of examples from Gehl's work around the globe *People Cities* Annie Matan, Peter Newman, 2016-11-15 Over the last 50 years architect Jan Gehl has changed the way that we think about architecture and city planning moving from the Modernist separation of uses to a human scale approach inviting people to use their cities *People Cities* tells the inside story of how Gehl learned to study urban spaces and implement his people centered approach in car dominated cities It discusses the work theory life and influence of Gehl from the perspective of those who have worked with him in cities across the globe It will inspire anyone who wants to create vibrant human scale cities and understand the ideas and work of the architect who has most influenced urban design **Architecture and Welfare** Thordis Arrhenius, Ellen Braae, Guttorm Ruud, 2025-01-27 Architecture was fundamental to the realization of welfare state policy in the Nordic countries translating democratic ideals into concrete spatial materializations An inclusive notion of welfare for all was embraced by a generation of architects landscape architects and planners who labored to give physical form to ideas of equality collectivity and democracy producing a vast architectural output in Scandinavia during the postwar years Today however the architectural legacy of this era is contested Welfare for all no longer enjoys the social or political consensus it once did This publication critically engages with this contested architectural legacy and provides a nuanced portrait of postwar welfare architecture coming to terms with a contentious past and facing an uncertain future With newly commissioned photographic work by contemporary Nordic artists Based on an interdisciplinary research project by KTH Stockholm Oslo School of Architecture University of Copenhagen Internationally renown contributors shed light on aspects of the relationship between architecture and welfare *The City Reader* Richard T. LeGates, Richard T. Legates, Frederic Stout, Roger W. Caves, 2020-05-14 The seventh edition of the highly successful *The City Reader* juxtaposes the very best classic and contemporary writings on the city Sixty three selections are included forty five from the sixth edition and eighteen new selections including three newly written exclusively for *The City Reader* The anthology features a Prologue essay on How to Study Cities eight part introductions as well as individual introductions to each of the selected articles The new edition has been extensively updated and expanded to reflect the latest thinking in each of the disciplinary and topical areas included such as sustainable urban development globalization the impact of technology on cities resilient cities and

urban theory The seventh edition places greater emphasis on cities in the developing world the global city system and the future of cities in the digital transformation age While retaining classic writings from authors such as Lewis Mumford Jane Jacobs and Louis Wirth this edition also includes the best contemporary writings of among others Peter Hall Manuel Castells and Saskia Sassen New material has been added on compact cities urban history placemaking climate change the world city network smart cities the new social exclusion ordinary cities gentrification gender perspectives regime theory comparative urbanization and the impact of technology on cities Bibliographic material has been completely updated and strengthened so that the seventh edition can serve as a reference volume orienting faculty and students to the most important writings of all the key topics in urban studies and planning The City Reader provides the comprehensive mapping of the terrain of Urban Studies old and new It is essential reading for anyone interested in studying cities and city life

Architectural Research Addressing Societal Challenges Volume 1 Manuel Jorge Rodrigues Couceiro da Costa, Filipa Roseta, Susana Couceiro da Costa, Joana Pestana Lages, 2017-09-19 The EAAE ARCC International Conference held under the aegis of the EAAE European Association for Architectural Education and of the ARCC Architectural Research Centers Consortium is a conference organized every other year in collaboration with one of the member schools universities of those associations alternatively in North America or in Europe The EAAE ARCC Conferences began at the North Carolina State University College of Design Raleigh with a conference on Research in Design Education 1998 followed by conferences in Paris 2000 Montreal 2002 Dublin 2004 Philadelphia 2006 Copenhagen 2008 Washington 2010 Milan 2012 and Honolulu 2014 The conference discussions focus on research experiences in the field of architecture and architectural education providing a critical forum for the dissemination and engagement of current ideas from around the world *Urban Lighting for People* Navaz Davoudian, 2019-07-15 Book Award Finalist for Urban Design Group Awards 2020 Lighting has the power to illuminate and enhance our experience within the built environment The light that enables people to travel around their neighbourhood or their city the light which they see themselves and their neighbourhood under Research into the effects of urban lighting on behaviour environmental psychology and social interaction is developing at a rapid rate Yet despite the affect it has on our daily lives the practical application of this research is a relatively untapped resource This book explores

the needs and experiences of people at night and how these can be addressed by public lighting It will give readers the confidence to develop more sophisticated lighting plans and add value to their projects Case studies provide in depth analysis of real life projects and will help the reader to understand lighting designers own experiences including post installation observations Written in an accessible style by an array of experts this is an essential book for practitioners academics and students alike that will enable you to put the research in to practice and develop better lighting for better places

Architecture and the Public Good Tom Spector,2021-06-01 Why has explaining the value of the architecture profession proven so difficult The architecture profession can be well defended by demonstrating the public good which results from its protected practice Although the book believes in this approach this approach immediately raises the thorny questions of just who is the public and what is its good To answer these questions to explain why the profession has done a poor job explaining itself and to propose a fresh perspective are the challenges set out in this book The book dissects the internal weaknesses and external forces which have prevented architects from asserting their value to the public explains how the concept of the public is itself widely misunderstood investigates the shifting boundaries of the public and private realms and proposes a series of measures by which we can assess and improve an architectural work s publicness Through a renewed focus on the public good that everyday architects are capable of as a profession the book charts an ultimately optimistic program for the architecture profession s renewal
