Becoming_Vera Z. Wei, Her mother a trafficked woman sold into a remote Chinese village viewed her daughter as nothing more than a living reminder of violence In a home ruled by poverty silence and misogyny not a single soul welcomed Zhang Wei s arrival Not one Raised without love warmth or hope Zhang Wei learned early that no one was coming to save her Survival became her only dream fueled by sheer grit and the refusal to break Then fate twisted She was adopted by an elite American family and given a new name a new language a new identity Vera But true transformation doesn t come with a name change To rise she must relearn how to be loved how to trust how to stand tall in a world where every rule was written without her in mind She must navigate high society battle self doubt and confront the shadows of a past that refuses to release her Was it luck that changed her life or did she seize destiny with her own hands Roses don t bloom in greenhouses but they always bloom in the wind Becoming Vera is not a fairytale It is the powerful story of a girl who was never meant to thrive and who bloomed anyway

Facing the Consequences W.H. Schmidt, Curtis C. McKnight, Leland S. Cogan, Pamela M. Jakwerth, Richard T. Houang, 2007-05-08 Facing the Consequences presents a perspective on US mathematics and science education that is developed from data gathered as part of the Third International Mathematics and Science Study TIMSS TIMSS is the most extensive and far reaching cross national comparative study of mathematics and science education ever attempted It includes comparing official curricula textbooks teacher practices and student achievements for many countries from 20 to 50 countries depending on the particular comparison Thousands of official documents and textbooks were analyzed Thousands of teachers principals and other experts responded to survey questionnaires A sample of mathematics teachers in three countries had their lessons videotaped Hundreds of thousands of children in almost 50 countries were tested in mathematics and science This report presents a closer look at US mathematics and science education through careful examination of TIMSS data The authors believe this investigation shows how deceptive many often unquestioned assumptions about American education can be Drawing upon many new analyses not previously reported and integrating these with previous analyses of TIMSS data the authors develop and illustrate the argument that what happens to American students is the consequence of American beliefs that shape educational practice and the accretion of a myriad educational choices made in mathematics and science education

Literacy and Language in East Asia Marilyn Kell,Peter Kell,2013-08-13 This book critically explores why some Asian nations are on top of the world in students achievement tests in reading and literacy yet governments and industry in these nations are anxious about a crisis in education Why are governments anxious about the capabilities and skills of school and university graduates in a global economy when there is a Asian economic boom The authors explore questions about how the Asian countries value test based examination curriculum and its influence on the practices of teaching learning and the lives of young people in Asia The authors describe the challenge of change for East Asian nations to develop more relevant approaches to literacy and language and more inclusive societies focussed on the needs of young people and not exam results

The Economics of School Choice Caroline M. Hoxby,2007-11-01 Now that the U S Supreme Court has declared school voucher programs constitutional the many unanswered questions concerning the potential effects of school choice will become especially pressing Contributors to this volume draw on state of the art economic methods to answer some of these questions investigating the ways in which school choice affects a wide range of issues Combining the results of empirical research with analyses of the basic economic forces underlying local education markets The Economics of School Choice presents evidence concerning the impact of school choice on student achievement

school productivity teachers and special education It also tackles difficult questions such as whether school choice affects where people decide to live and how choice can be integrated into a system of school financing that gives children from different backgrounds equal access to resources Contributors discuss the latest findings on Florida's school choice program as well as voucher programs and charter schools in several other states The resulting volume not only reveals the promise of school choice but examines its pitfalls as well showing how programs can be designed that exploit the idea's potential but avoid its worst effects With school choice programs gradually becoming both more possible and more popular this book stands out as an essential exploration of the effects such programs will have and a necessary resource for anyone interested in the idea of school choice

Success and Failure in Israeli Elementary Education

Abram Minkowich, Dan Deyá¹is, Joseph Bashi, This book presents a comprehensive evaluation study of elementary education in Israel conducted over several years and completed in 1977 The study concentrates on Jewish schools but some data are presented from parallel studies in the Arab Schools A notable feature of the study is its unusually large scope both in size and content It sampled nearly ten percent of Jewish schools and fifteen percent of Arab schools The content includes a great variety of areas cultural origins home conditions and socialization patterns of pupils conditions and practices in schools teachers and principals backgrounds and their attitudes toward central issues in education pupils personality characteristics and motivations related to school experience their learning abilities and achievements in five major school subjects Special emphasis is given to the disadvantaged pupils and an examination of the problem of equality of educational opportunity This study's uniqueness lies in a novel approach in the measurement and analysis of scholastic achievements Like all studies in the psychometric tradition it places pupils in a position related to an advantaged pupil group But test construction and most data analyses were carried out by the criterion reference approach combined with a notion of master learning This enabled presentation of the absolute achievement level of a pupil or a pupil group vis a vis the optimal and minimal requirements of

the curriculum and each school subject as well as for its various content area This approach permits much more than the traditional methods utilization of results for deliberation and revision in educational policies This applies particularly to curriculum construction and methods of instruction It may also lead to a more appropriate definition of the disadvantaged pupil Five chapters of the study present a historical review and sociological analysis of the problems of Israeli education and deal with specific methodological considerations The twelve following chapters present detailed results and analysis for each topic of investigation Common Core Math For Parents For Dummies with Videos Online Christopher
