that means to comprise competencies and market opportunities Strategy has to keep in view the own company the customers
and the competitors The challenge is to create customer values and competitive advantages to assure benefits and growth As
a result the starting point of every strategic decision demonstrates the recognition and the analysis of the company's current
situation containing a high variety of parameters These parameters are generally defined by the company's influence into
internal and external parameters However the understanding of the company's situation is only defined in absolute by
analysing parameters and its bilateral dependencies Therefore the combination of the company's internal factors and the
external environmental circumstances presents the basis for the strategy development and the resulting organisational
marketing goals and application of the marketing instruments The SWOT analysis is a strategic planning tool used to
evaluate the Strengths Weaknesses Opportunities and Threats of a company It provides information that is helpful in
matching the company's resources and capabilities to the competitive environment in which it operates The resulting SWOT
matrix contrasts the results of the internal analysis strengths and weakness and the external analysis opportunities and
threats to define strategic fields of action That application of a SWOT analysis is therefore instrumental in strategy
formulation and selection
