**Nuclear Reactor Thermal Hydraulics** Robert E. Masterson, 2019-08-21 Nuclear Thermal Hydraulic Systems provides a comprehensive approach to nuclear reactor thermal hydraulics reflecting the latest technologies reactor designs and safety considerations The text makes extensive use of color images internet links computer graphics and other innovative techniques to explore nuclear power plant design and operation Key fluid mechanics heat transfer and nuclear engineering concepts are carefully explained and supported with worked examples tables and graphics Intended for use in one or two semester courses the text is suitable for both undergraduate and graduate students A complete Solutions Manual is available for professors adopting the text

**Thermal Metamaterials: Controlling The Flow Of Heat** Ying Li, Liujun Xu, Cheng-wei Qiu, 2025-02-10 This book gives a comprehensive review on thermal metamaterials an emerging type of artificial structures designed for the control of heat transfer To date many exciting findings have been made in this field including some novel understandings about the heat transfer processes reciprocity symmetry topological properties etc as well as promising new possibilities to control heat cloaking rectification collection etc The text is organized into three segments steady state time harmonic and transient heat transfer In Part I the transformation theory and effective medium method are introduced with their applications on the manipulation of steady state heat transfer covering early studies in this field In Part II the recently developed thermal scattering theory and temporal modulation method are discussed in the context of controlling time harmonic heat transfer In Part III the effective Hamiltonian method is presented to study the decaying thermal modes in transient heat transfer We include detailed derivations and examples for each theory or method The book ends with an outlook chapter on open problems and potential possibilities in this promising field

**Using Supercritical Water Oxidation to Treat Hydrolysate from VX Neutralization** National Research Council, Division on Engineering and Physical Sciences, Commission on Engineering and Technical Systems, Committee on Review and Evaluation of the Army Chemical Stockpile Disposal Program, 1998-05-08 The U S Army has asked the National Research Council NRC to evaluate whether supercritical water oxidation SCWO is an effective and appropriate means of eliminating hazardous or toxic organic constituents in VX hydrolysate for ultimate disposition The NRC was not asked to conduct an in depth analysis of the entire integrated VX bulk agent destruction and disposal process for the Newport Chemical Agent Disposal Facility As the facility design is being finalized March 1999 April 2000 the NRC will probably be asked to assess all aspects of the facility design including monitoring containment process control and redundancy as well as the quantitative risk assessment QRA This report outlines the elements of the proposed neutralization SCWO technology evaluates the results of ongoing SCWO tests and makes recommendations concerning aspects of the technology that require further development The scope of this evaluation did not include evaluations of other potential technologies or management options for the treatment of VX hydrolysate
