Queer Friendship George E. Haggerty, 2018-03-29 Friendship in the classical world was celebrated as among the highest human achievements nothing was more likely to lead to the divine than looking for it in the eyes of a friend In exploring the complexities of male male relations beyond the simple labels of sexuality Queer Friendship shows how love between men has a rich and varied history in English literature The friend could offer a reflection of one's own worth and a celebration of a kind of mutuality that was not connected to family or home These same sex friendships are memorable because they give shape to the novels of which they are a part and question the assumption that the love between friends is different from the love between lovers Queer Friendship explores English literary friendship in three ways the elegiac the erotic and the platonic by considering a myriad of works including Sterne's Tristram Shandy Tennyson's In Memoriam A H H and Dickens' Great Expectations

**The Palgrave Handbook of Gothic Origins** Clive Bloom, 2022-01-01 This handbook provides a comprehensive overview of research on the Gothic Revival The Gothic Revival was based on emotion rather than reason and when Horace Walpole created Strawberry Hill House a gleaming white castle on the banks of the Thames he had to create new words to describe the experience of gothic lifestyle Nevertheless Walpole's house produced nightmares and his book The Castle of Otranto was the first truly gothic novel with supernatural sensational and Shakespearean elements challenging the emergent fiction of social relationships The novel's themes of violence tragedy death imprisonment castle battlements dungeons fair maidens secrets ghosts and prophecies led to a new genre encompassing prose theatre poetry and painting whilst opening up a whole world of imagination for entrepreneurial female writers such as Mary Shelley Joanna Baillie and Ann Radcliffe whose immensely popular books led to the intense inner landscapes of the Bronte sisters Matthew Lewis's The Monk created a new gothic atheistic decadent perverse necrophilic and hellish The social upheaval of the French Revolution and the emergence of the Romantic movement with its more intense and often atheistic self absorption led the gothic into darker corners of human experience with a greater emphasis on the inner life hallucination delusion drug addiction mental instability perversion and death and the emerging science of psychology The intensity of the German experience led to an emphasis on doubles and schizophrenic behaviour ghosts spirits mesmerism the occult and hell This volume charts the origins of this major shift in social perceptions and completes a trilogy of Palgrave Handbooks on the Gothic combined they provide an exhaustive survey of current research in Gothic studies a go

to for students and researchers alike      **Historical Dictionary of Romanticism in Literature** Paul Varner,2014-11-18

The Historical Dictionary of Romanticism in Literature provides a large overview of the Romantic Movement that seemed at the time to have swept across Europe from Russia to Germany and France to Britain and across the Atlantic to the United States The Romantics saw themselves as inaugurating a new era They frequently referred to themselves or their contemporaries as Romantics and their art as Romantic From the early stirrings in Germany to the last decade of the eighteenth century in England with the political radicals and the Lake Poets to the Transcendental Club in Massachusetts the leaders of the age acknowledged their new Romantic attitudes This volume takes a close and comprehensive look at romanticism in literature through a chronology an introductory essay appendixes and an extensive bibliography The dictionary section has over 800 cross referenced entries on the writers and the poems novels short stories and essays plays and other works they produced the leading trends techniques journals and literary circles and the spirit of the times are also covered This book is an excellent access point for students researchers and anyone wanting to know more romanticism in literature      Stages of European Romanticism Theodore Ziolkowski,2018 Employs an innovative approach by stages to offer a unified vision of European Romanticism over the half century of its growth and decline Romanticism was a truly European phenomenon extending roughly from the French Revolution to the 1848 revolutions and embracing not only literature and drama but also music and visual arts Because of Romanticism s vast scope most treatments have restricted themselves to single countries or to specific forms notably literature art or music This book takes a wider view by considering in each of six chapters representative examples of works from across Europe and across a range of the arts that were created in a single year For instance in the first chapter focusing on the year 1798 Beethoven s Path tique sonata Wordsworth and Coleridge s Lyrical Ballads Tieck s novel Franz Sternbalds Wanderungen and Goya s painting El sue o de la raz n The following chapters treat works from the years 1808 1818 1828 1838 and 1848 This approach by stages makes it possible to determine characteristics of six stages of Romanticism in its historical and intellectual context and to note the conspicuous differences between these stages as European Romanticism developed for example the waxing and waning of religious themes the shifting visions of landscape the gradual ironic detachment from early Romanticism In sum the volume offers a unified vision of European Romanticism in all its aesthetic forms over the half century of its growth and decline Theodore Ziolkowski is Professor Emeritus of German and Comparative Literature Princeton University      **The Technology of the Novel** Tony E. Jackson,2009-05-13 The connection between speech and writing in human language has been a matter of philosophical debate since antiquity By plumbing the depths of this complex relationship Tony E Jackson explains how the technology of alphabetic writing has determined the nature of the modern novel Jackson s analysis begins with the universal human act of oral storytelling While telling stories is fundamental to human experience writing is not Yet the novel perhaps more than any other literary form depends on writing In fact as Jackson shows quite clearly it is writing rather than print that most shapes

the forms and contents of the genre Through striking new readings of works by Austen Mary Shelley Dickens Forster Woolf Lessing and McEwan Jackson reveals how the phenomena of speech and storytelling interact with the technological characteristics of writing He also explains how those interactions induced the generic changes in the novel from its eighteenth century beginnings to postmodernism and beyond His claims grounded in a contemporary understanding of human cognitive capacities and constraints offer a fresh interpretive approach to all written literature An essential text in the study of the written word The Technology of the Novel provides new insights into the evolving nature of one of the modern world s most popular narrative forms      *Metafiction and Metahistory in Contemporary Women's Writing* A. Heilmann, M. Llewellyn, 2007-04-11 This collection examines the dynamic experimentation of contemporary women writers from North America Australia and the UK Blurring the dichotomies of the popular and the literary the fictional and the factual the essays assembled here offer new approaches to reading contemporary women fiction writers reconfigurations of history
