Tan, Ridwanul Hoque, 2021-01-28 This volume addresses the idea of origins how things are formed and how they relate to

their present and future in terms of constitution making which is a continuous process in South Asian states. It examines the drafting nature, core values and roles of the first modern constitutions during the founding of the eight modern nation states in South Asia. The book looks at the constitutions of Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka. It provides an explanatory description of the process and substantive inputs in the making of the first constitutions of these nations; it sets out to analyse the internal and external, including intra-regional forces surrounding the making of these constitutions and it sets out theoretical constructions of models to conceptualise the nature and role of the first constitutions, including constituent documents in the founding of the modern nation states and their subsequent impact on state building in the region.

Bringing together research from the fields of linguistics, education and technology within the dynamic context of South Asia, this timely book investigates the ways in which these fields interact with each other against the backdrop of technological innovation, linguistic diversity and socio-political transformation. Developing and expanding on findings and insights originating from a conference organised by the Education South Asia Initiative at the University of Oxford, this interdisciplinary book features academic reflections on language, politics and diversity, as well as empirical insights on linguistic, educational and technological transformations in the region. Featuring analytical and methodological approaches to the study of language and education, chapters range in context from India, Bangladesh, Nepal, Pakistan and Sri Lanka and address a range of issues such as the marginalisation of languages in education and policy, the interactions between language and social hierarchies in the South Asian context and technology's impact on language education, acquisition, usage and preservation. Ultimately initiating dialogue on the need for positive changes in language education research and policy, this book will appeal to scholars, researchers and postgraduate students in the fields of language education, international and comparative education and education and technology. Bangladesh government publicly designated the thousands of women raped by the Pakistani military and their local collaborators as birangonas brave women Nayanika Mookherjee demonstrates that while this celebration of birangonas as heroes keeps them in the public memory they exist in the public consciousness as what Mookherjee calls a spectral wound Dominant representations of birangonas as dehumanized victims with disheveled hair a vacant look and rejected by their communities create this wound the effects of which flatten the diversity of their experiences through which birangonas have lived with the violence of wartime rape In critically examining the pervasiveness of the birangona construction Mookherjee opens the possibility for a more politico economic ethical and nuanced inquiry into the sexuality of war
