Dynamics and Terminology Rita Temmerman, Marc Van Campenhoudt, 2014-12-15 The urge to understand all aspects of human experience more and better seems to be one of the motives underlying cognitive development in many domains of human existence Understanding more and better is at the basis of knowledge creation and extension One way of getting access to how understanding comes about and how knowledge is the result of a continuous dynamics of understanding and misunderstanding is by studying the cognitive potential and the development of natural language s and more particularly of terminology in specialized domains In this volume on dynamics and terminology thirteen contributors illustrate that human cognition is a dynamic process in a variety of socio cognitive and cultural settings The case studies encompass a panoply of methodologies and deal with subjects ranging from the dynamics of legal understanding in multilingual Europe over financial economic and scientific terminology in several cultural and linguistic settings to language policy issues in multilingual environments All thirteen contributors link the dynamics of cognition to the creative potential of language as a repository of past and present experience in cultural settings and to the creation of neologisms in domain specific languages Attention is given to the functionality of indeterminacy vagueness polysemy ambiguity synonymy metaphor and phraseology In this volume terminology is researched and discussed from an interdisciplinary perspective combining insights developed over the

Theory and Practice of Specialised Online Dictionaries Pedro A. Fuertes-Olivera, Sven Tarp, 2014-09-23 This book is the first comprehensive monograph on the Function Theory of Lexicography which originated at the Aarhus School of Business Aarhus University Function Theory considers dictionaries to be tools that are constructed for assisting specific users with punctual needs in specific usage situations e g communicative oriented situations and cognitive oriented situations. The book s main focus is on defending the independent academic status of lexicography and its corollary The process of designing compiling and updating specialised online dictionaries needs a theoretical framework that addresses general and specific aspects The former are common to all types of information tools the latter are mainly dependent on the media for which the information tool is constructed and their specific target users This books offers both aspects and moves from the highest level of abstraction to very detailed aspects of lexicographic work e g how to convert an originally conceived polyfunctional online dictionary into several monofunctional usage based ones The book illustrates that the theory and the methodology currently used by advocates of the Function Theory of Lexicography offers better results than other approaches and therefore makes its case for proposing the Function Theory for terminological terminographical work **Nachträge** Herbert Ernst Wiegand, 2014-12-16 Die Titelnachtr ge im Band 4 der Internationalen Bibliographie zur germanistischen Lexikographie und W rterbuchforschung Mit Ber cksichtigung anglistischer nordistischer romanistischer slavistischer und weiterer metalexikographischer Forschungen betreffen nicht nur den Zeitraum von 2007 bis 2014 sondern auch Arbeiten die vor 2007 erschienen sind Ein 5 Band der das Sachregister enth lt erscheint voraussichtlich 2015 The World's Languages Catalog ,1971 Guide to Reference in Business and Economics Steven W.
