

SONOPULS 490

Ultrasound is successfully used for the treatment of wounds, post-traumatic complaints, circulatory disorders and conditions of the skin and peripheral nerves. With the Sonopuls 490, you have all the possibilities for the universal application of ultrasound with two ultrasound frequencies: 1 and 3 MHz. These frequencies have different absorption characteristics so that both surface and deep tissue structures can be treated selectively. Both continuous and pulsed applications of ultrasound are possible.

The combination of the high power of 2 W/cm² with the large ERA (Effective Radiation Area) of the Enraf-Nonius ultrasound heads ensure that you can treat at great depth and that you can reduce the treatment time compared with lower dosage equipment.

In addition, the Sonopuls 490 features nine pre-programmed protocols and has the possibility to store nine of your own protocols. As a result the Sonopuls 490 is exceptionally easy to operate.

The Sonopuls 490 is a mains-powered piece of equipment. This means that the Sonopuls 490 is ready for use throughout the day. In addition, for ambulatory treatment or treatment at home, a rechargeable battery can be supplied as an option.

- Continuous and pulsed ultrasound therapy
- Multi-frequency treatment head with 1 and 3 MHz
- Contact control: automatic power switch-off and treatment time interruption in case of insufficient contact (the visual indicator of the treatment head switched on)
- 9 pre-programmed protocols
- 9 free programmable memory positions
- Well suited for treatment of hospitalised patients or patients at home
