Krogstie,Selmin Nurcan,Erik Proper,Rainer Schmidt,Roland Ukor,2010-05-20 This book contains the proceedings of two well

established scientific events held in connection with the CAiSE conferences relating to the areas of enterprise business processes and information systems modeling. The 11th International Workshop on Business Process Modeling Development and Support BPMDS 2010. The 15th International Conference on Exploring Modeling Methods for Systems Analysis and Design EMMSAD 2010. The two events are introduced briefly below. BPMDS 2010 was the 11th in a series of workshops that have successfully served as a forum for raising and discussing new ideas in the area of business process development and support. The BPMDS series has produced 10 workshops from 1998 to 2009. Eight of these workshops including the last seven BPMDS 2003–BPMDS 2009 were held in conjunction with CAiSE conferences. The BPMDS workshops focus on topics relating to IT support for business processes which addresses key issues that are relevant to the continuous development of information systems theory. The continued interest in these topics within the industrial and academic IS communities is reflected by the success of the last BPMDS workshops and the emergence of new conferences devoted to this theme. Previous BPMDS workshops focused on the different phases in the business process life cycle as well as the drivers that motivate and initiate business process design and evolution.
