Talking and Doing Science in the Early Years Sue Dale Tunnicliffe, 2013-05-29

Young children are intuitive emergent scientists they observe raise hypotheses experiment and notice patterns Most of our everyday actions at home and in other settings inside and outside have a scientific basis and it is through these early experiences that children formulate their ideas about the world in which we live

This accessible book introduces the simplest form of the principles and the big ideas of science and provides a starting point for encouraging children to have an interest and experiential understanding of basic science and engineering

It shows you how you can support young children in exploring everyday phenomena and develop their scientific language skills through readily available resources and hands on experiences Each chapter focuses on a different aspect of science and includes a summary of the big ideas to refresh your own scientific knowledge numerous activities that encourage young children to observe question and carry out their own investigations a useful list of everyday resources and relevant vocabulary

Providing a wealth of exciting meaningful ways to promote scientific experiences and learning this highly practical book will help you to build on children's natural curiosity about the world and develop their understanding through

your everyday provision in early years settings and at home **Environment** Peter H. Raven,Linda R. Berg,David M. Hassenzahl,2012-12-17 Raven s 8th edition of Environment offers more detailed content than the Visualizing text for a better understanding and integration of the core environmental systems and to view and analyze the role those systems play Shorter but still comprehensive coverage focuses on ethical decision making and key local environmental science issues requiring readers to think critically about the course material outside of the classroom Other features include brief text in the comprehensive segment extensive chapter pedagogy to help reinforce the systems approach more opportunities to think critically about the how systems intersect and fit together and new data interpretation questions at the end of each chapter
