

Examples Of Informative Abstract

Ronnie Green Informative Abstract June 28, 2011 Image gap is the difference between how a person wants to look and sound compared to how they are actually viewed by others. Projecting your desired image can build trust and is critical to successful communication. Projecting an inappropriate image, however, can erode trust and cause others to doubt your abilities. Four components of your overall image are your projected first impression, your depth of knowledge, your breadth of knowledge, and your enthusiasm.

Essay Example on What Is Informative Abstract

Your projected first impression is the initial impact you make on another person due to your dress, voice, grooming, handshake, eye contact, and body language. First impressions tend to be long lasting and difficult to overcome. To create a positive first impression, you should have a firm but not overpowering handshake. Sit and walk in a straight yet relaxed manner. Maintain high standards of personal hygiene and grooming. Speak clearly while naturally varying your tone and volume.

Finally, dress appropriately for your job responsibilities and work environment since skillful dressing can evoke positive responses to your personality. Depth of knowledge refers to how well you know your area of expertise. Demonstrating your depth of knowledge can project credibility and demand respect. You can develop depth of knowledge by studying company policies and industry standards. You can also take advantage of training programs offered by your company. Breadth of knowledge reflects your ability to communicate with others on topics outside your area of expertise.

Breadth of knowledge allows you to more easily develop rapport with others. It will also allow you to increase your circle of influence with various types of people. You can increase your breadth of knowledge by reading a variety of books and magazines, watching and listening to a diverse selection of television and radio programs, and interacting with a wide array of individuals. If you encounter a person whose interests you are not familiar with, you can quickly gain knowledge and show interest by asking questions.

An appropriate level of enthusiasm demonstrates your sincere interest in a subject and desire to accomplish a task. Enthusiastic people tend to work harder, longer, and more accurately than those who are not enthusiastic. Additionally, your enthusiasm, positive or negative, will spread to those around you. These elements help dictate the response you receive from others in everyday interactions. A positive response demonstrates successful interpersonal relations. It will also foster open, honest, and trusting communications.

Advances in Automatic Text Summarization Inderjeet Mani, Mark T. Maybury, 1999 Until now there has been no state of the art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. With the rapid growth of the World Wide Web and electronic information services, information is becoming available on line at an incredible rate. One result is the oft-decried information overload. No one has time to read everything yet we often have to make critical decisions based on what we are able to assimilate. The technology of automatic text summarization is becoming indispensable for dealing with this problem. Text summarization is the process of distilling the most important information from a source to produce an abridged version for a particular user or task. Until now there has been no state of the art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. The book is organized into six sections: Classical Approaches, Corpus Based Approaches, Exploiting Discourse Structure, Knowledge Rich Approaches, Evaluation Methods, and New Summarization Problem Areas. Zamora. **Scientific Papers and Presentations** Martha Davis, 2004-10-09 Electronic publishing and electronic means of text and data presentation have changed enormously since the first edition was first published in 1997. This second edition applies traditional principles to today's modern techniques. In addition to substantial changes on the poster presentations and visual aids chapters, the chapter on proposal writing discusses in more detail grant writing proposals. A new chapter has also been dedicated to international students studying in the United States. Selected Contents: Searching and Reviewing Scientific Literature, The Graduate Thesis, Publishing in Scientific Journals, Reviewing and Revising Titles and Abstracts, Ethical and Legal Issues, Scientific Presentations, Communication without words, The Oral Presentation, Poster Presentations. **Essentials of Scientific Writing** Joseph Mugah, 2016-12-13 Essentials of Scientific Writing: How to Write Effective Titles and Abstracts for Research Papers and Proposals is a belated entrant into a vast and crucially important area with scarce reference materials. This scarcity manifested itself as I searched what I had expected would be useful source materials for the present book. I skimmed through many textbooks on scientific writing and editing, articles on the Internet, and notes from courses on scientific writing. They all turned out to be manifestly wanting in both depth and scope. None extended beyond two pages and most were hardly a page long so they were largely useless for my purposes. To the authors' knowledge, few published books treat the subjects of

Titles and Abstracts in the kind of detail presented in this book Accordingly in developing the book the author hoped to fill a void in the crucial area of facilitating sharing of knowledge and information from research work It is my hope that everyone writing scientific work will endeavor to find space for the book on their shelves and will place it within arms length whenever they are writing or editing the title or abstract **Understanding and Evaluating Research** Sue L.
